MANAGEMENT'S DISCUSSION AND ANALYSIS

The following management's discussion and analysis ("MD&A") of financial condition and results of operations for Whitecap Resources Inc. (the "Company" or "Whitecap") is dated July 28, 2020 and should be read in conjunction with the Company's unaudited interim consolidated financial statements and related notes for the period ended June 30, 2020, as well as the audited annual consolidated financial statements and related notes for the year ended December 31, 2019. These unaudited interim consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS"), specifically International Accounting Standard ("IAS") 34, *Interim Financial Reporting*, in Canadian dollars, except where indicated otherwise. Accounting policies adopted by the Company are set out in the notes to the audited annual consolidated financial statements for the year ended December 31, 2019 and Note 3 of the unaudited interim consolidated financial statements for the period ended June 30, 2020. The unaudited interim consolidated financial statements of Whitecap have been prepared by management and approved by the Company's Board of Directors. The MD&A should also be read in conjunction with Whitecap's disclosure under "Non-GAAP Measures" and "Forward-Looking Information and Statements" below. Additional information respecting Whitecap, is available on the SEDAR website (www.sedar.com) and on our website (www.sedar.com) and on our website (www.sedar.com) and on our website (www.sedar.com) and on

DESCRIPTION OF BUSINESS

Whitecap is a Calgary based oil and gas company that is engaged in the business of acquiring, developing and holding interests in petroleum and natural gas properties and assets. Whitecap's common shares are traded on the Toronto Stock Exchange ("TSX") under the symbol WCP.

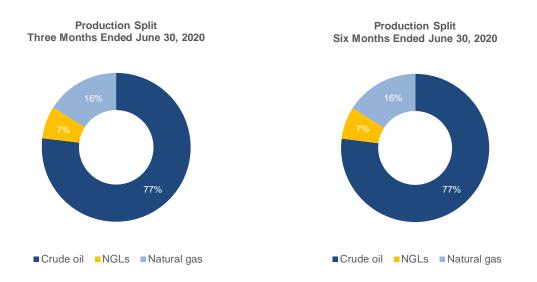

2020 SECOND QUARTER FINANCIAL AND OPERATIONAL RESULTS Production

Whitecap's average production volumes and commodity splits were as follows:

	Three months ended		Six months ended	
		June 30		June 30
	2020	2019	2020	2019
Crude oil (bbls/d) (1)	54,067	55,155	55,349	55,177
NGLs (bbls/d)	5,288	4,417	5,183	4,402
Natural gas (Mcf/d) (1)	68,712	66,231	69,589	66,358
Total (boe/d) (2)	70,807	70,611	72,130	70,639

Notes:

Exhibit 1

⁽¹⁾ References to crude oil or natural gas production in the above table and elsewhere in this MD&A refer to the light and medium crude oil and conventional natural gas, respectively, product types as defined in National Instrument 51-101 – Standards of Disclosure for Oil and Gas Activities.

⁽²⁾ Disclosure of production on a per boe basis in this MD&A consists of the constituent product types and their respective quantities disclosed in this table.

In the second quarter of 2020, average production volumes of 70,807 boe/d were consistent with 70,611 boe/d in the second quarter of 2019. Year to date, average production volumes increased two percent to 72,130 boe/d from 70,639 boe/d for the same period in 2019. The increase in production volumes was primarily attributable to capital investments in 2019 and in the first quarter of 2020, partially offset by natural declines.

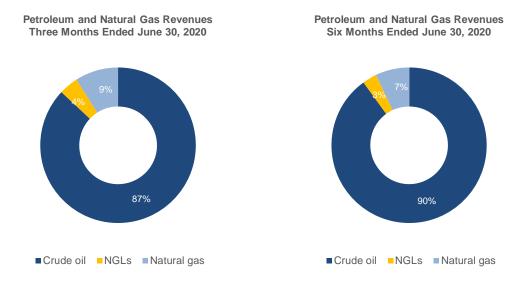

Our crude oil and NGLs weightings in the three and six months ended June 30, 2020 were generally consistent with the same periods in 2019.

Petroleum and Natural Gas Sales

A breakdown of petroleum and natural gas sales is as follows:

	Three r	nonths ended June 30	Six n	nonths ended June 30
(\$000s)	2020	2019	2020	2019
Crude oil	130,626	358,341	375,285	674,292
NGLs	6,338	9,045	12,020	20,059
Natural gas	13,503	7,344	27,479	23,618
Petroleum and natural gas revenues	150,467	374,730	414,784	717,969
Tariffs	(2,686)	(2,788)	(5,772)	(6,347)
Processing & other income	6,141	3,480	8,341	6,740
Marketing revenue	3,778	3,912	12,449	15,833
Petroleum and natural gas sales	157,700	379,334	429,802	734,195

Exhibit 2

Petroleum and natural gas revenues in the second quarter of 2020 decreased 60 percent to \$150.5 million from \$374.7 million in the second quarter of 2019. The decrease of \$224.2 million consists of \$219.2 million attributed to lower realized prices and \$5.0 million attributed to lower crude oil production volumes. Year to date, petroleum and natural gas revenues decreased 42 percent to \$414.8 million from \$718.0 million for the same period in 2019. The decrease of \$303.2 million consists of \$310.1 million attributed to lower realized prices, partially offset by \$6.9 million attributed to higher production volumes.

Benchmark and Realized Prices

Average benchmark and realized prices are as follows:

	Three	months ended June 30	Six months ended June 30	
	2020	2019	2020	2019
Average benchmark prices				
WTI (US\$/bbl) (1)	27.85	59.81	37.01	57.36
Exchange rate (US\$/C\$)	1.39	1.34	1.37	1.33
WTI (C\$/bbl)	38.42	80.03	50.04	76.50
MSW Par at Edmonton (\$/bbl) (2)	29.55	73.59	40.58	70.00
Fosterton Par at Regina (\$/bbl)	26.10	70.52	35.71	67.08
Midale Par at Cromer (\$/bbl)	35.18	79.93	45.26	75.82
AECO natural gas (\$/Mcf) (3)	1.99	1.03	2.01	1.83
Average realized prices (4)				
Crude oil (\$/bbl)	26.55	71.40	37.25	67.52
NGLs (\$/bbl)	13.17	22.50	12.74	25.18
Natural gas (\$/Mcf)	2.16	1.22	2.17	1.97
Combined (\$/boe)	23.35	58.32	31.60	56.15

Notes:

Whitecap's weighted average realized price prior to the impact of hedging activities and tariffs decreased 60 percent to \$23.35 per boe in the second quarter of 2020 compared to \$58.32 per boe in the second quarter of 2019. Year to date, Whitecap's weighted average realized price prior to the impact of hedging activities and tariffs decreased 44 percent to \$31.60 per boe compared to \$56.15 per boe for the same period in 2019.

The WTI price decreased by 53 percent to average US\$27.85 per barrel in the second quarter of 2020 compared to US\$59.81 per barrel in the second quarter of 2019. The WTI price decreased by 35 percent to average US\$37.01 per barrel for the first half of 2020 compared to US\$57.36 per barrel for the first half of 2019. The MSW par oil prices decreased by 60 percent to average \$29.55 per barrel in the second quarter of 2020 compared to \$73.59 per barrel in the second quarter of 2019. The MSW par oil price decreased by 42 percent to average \$40.58 per barrel in the first half of 2020 compared to \$70.00 per barrel in the first half of 2019. The decreases are primarily due to unprecedented volatility in the second quarter of 2020 as a result of the record decrease in demand due to COVID-19, with US\$ WTI trading range of (US\$37.63) to US\$40.46. In addition to the demand impact from COVID-19, OPEC and other crude oil producing nations increased production as part of a market share strategy which increased global supply entering the second quarter of 2020. The decreases were partially offset by OPEC and other crude oil producing nations agreeing to production cuts in the second quarter of 2020 to help offset the COVID-19 demand destruction and attempt to stabilize commodity prices.

The Company's realized crude oil price in southwest Saskatchewan is based on the Fosterton par price at Regina. The Fosterton oil price decreased 63 percent to average \$26.10 per barrel in the second quarter of 2020 compared to \$70.52 per barrel in the second quarter of 2019. Fosterton par oil prices decreased 47 percent to average \$35.71 per barrel for the first half of 2020 compared to \$67.08 per barrel for the first half of 2019. The decreases are primarily due to lower WTI prices resulting from a record decrease in demand caused by the COVID-19 global pandemic and reduced refinery throughout North America. The decrease in the first half of 2020 was also the result of weaker Fosterton differentials relative to WTI compared to the same period in 2019.

WTI represents the calendar month average of West Texas Intermediate oil.

⁽²⁾ Mixed Sweet Blend ("MSW").

⁽³⁾ AECO represents the AECO 5A Daily Index price.

⁽⁴⁾ Prior to the impact of hedging activities and tariffs.

The Company's realized crude oil price in southeast Saskatchewan is based on the Midale par price at Cromer. The Midale par price decreased 56 percent to average \$35.18 per barrel in the second quarter of 2020 compared to \$79.93 per barrel in the second quarter of 2019. Midale par oil prices decreased 40 percent to average \$45.26 per barrel for the first half of 2020 compared to \$75.82 per barrel for the first half of 2019. The decreases are primarily due to lower WTI prices resulting from a record decrease in demand caused by the COVID-19 global pandemic and reduced refinery throughout North America.

The AECO daily spot price increased 93 percent to average \$1.99 per Mcf in the second quarter of 2020 compared to an average of \$1.03 per Mcf in the second quarter of 2019. The AECO daily spot price increased 10 percent to average \$2.01 per Mcf for the first half of 2020 compared to an average of \$1.83 per Mcf for the first half of 2019. The increases are primarily due to improved export pipeline efficiencies within the Western Canadian Sedimentary Basin, including access to interruptible service and storage.

The natural gas liquids realized price decreased 41 percent to average \$13.17 per barrel in the second quarter of 2020 compared to \$22.50 per barrel in the second quarter of 2019. The natural gas liquids realized price decreased 49 percent to average \$12.74 per barrel for the first half of 2020 compared to \$25.18 per barrel for the first half of 2019. The decreases are primarily due to COVID-19 related demand decrease, product oversupply and a reduction in benchmark pricing tied to WTI.

Risk Management and Hedging Activities

Whitecap maintains an ongoing risk management program to reduce the volatility of revenues in order to fund capital expenditures and pay cash dividends to shareholders.

The Company realized a gain of \$50.4 million and \$70.2 million on its commodity risk management contracts for the three and six months ended June 30, 2020, respectively. The unrealized gains and losses are a result of the non-cash change in the mark-to-market values period over period. The significant assumptions made in determining the fair value of financial instruments are disclosed in Note 4 to the Company's unaudited interim consolidated financial statements for the three and six months ended June 30, 2020.

	Three months ended June 30		Six months ended June 30	
Risk Management Contracts (\$000s)	2020	2019	2020	2019
Realized gain (loss) on commodity contracts	50,386	(11,653)	70,175	(14,703)
Unrealized gain (loss) on commodity contracts	(108,025)	29,474	41,359	(78,844)
Net gain (loss) on commodity contracts	(57,639)	17,821	111,534	(93,547)
Realized gain (loss) on interest rate contracts (1)	(459)	3	(318)	95
Unrealized loss on interest rate contracts (1)	(1,317)	(4)	(11,034)	(181)
Realized loss on equity contracts (2)	(4,606)	-	(4,314)	-
Unrealized gain (loss) on equity contracts (2)	12,252	-	(17,706)	-
Net gain (loss) on risk management contracts	(51,769)	17,820	78,162	(93,633)

Notes:

⁽¹⁾ The gain (loss) on interest rate risk management contracts is included in interest and financing expenses.

⁽²⁾ The gain (loss) on equity contracts is included in stock-based compensation expenses.

Exhibit 3

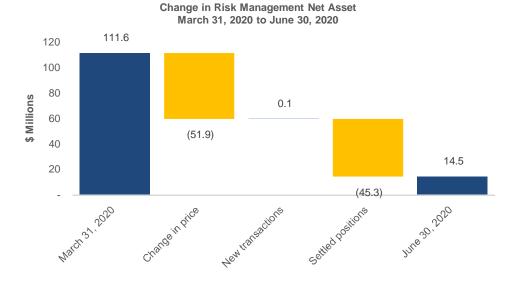

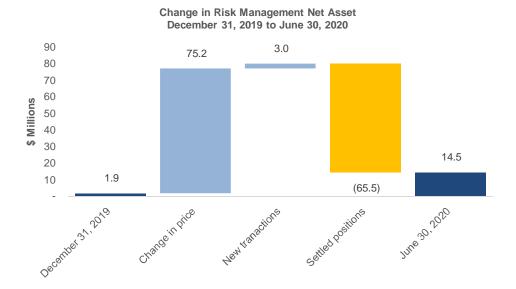

Exhibit 4

At June 30, 2020, the following risk management contracts were outstanding with an asset fair market value of \$39.3 million and a liability fair market value of \$24.8 million:

WTI Crude Oil Derivative Contracts

Royalties

	Three months ended		Six months ende	
		June 30		June 30
(\$000s, except per boe amounts)	2020	2019	2020	2019
Royalties	13,017	70,420	52,024	129,696
As a % of petroleum and natural gas revenues	8.7	18.8	12.5	18.1
\$ per boe	2.02	10.96	3.96	10.14

Royalties as a percentage of revenues in the second quarter of 2020 were 8.7 percent compared to 18.8 percent in the second quarter of 2019. Year to date, royalties as a percentage of revenues were 12.5 percent compared to 18.1 percent for the same period in 2019. The decreases were primarily attributable to lower realized pricing across all core areas, as well as favourable prior period adjustments in the first half of 2020 compared to the same period in 2019.

Whitecap pays royalties to the provincial governments and mineral owners in Alberta, Saskatchewan and British Columbia. Each province has separate royalty regimes which impact Whitecap's overall corporate royalty rate.

Operating Expenses

	Three m	onths ended	Six m	onths ended
		June 30		June 30
(\$000s, except per boe amounts)	2020	2019	2020	2019
Operating expenses	72,045	80,004	153,609	160,646
\$ per boe	11.18	12.45	11.70	12.56

Operating expenses per boe in the second quarter of 2020 decreased 10 percent to \$11.18 per boe compared to \$12.45 per boe in the second quarter of 2019. Year to date, operating expenses per boe decreased seven percent to \$11.70 per boe compared to \$12.56 per boe for the same period in 2019. The decreases were primarily attributed to lower workover costs and operating expense reduction initiatives by the Company in the first half of 2020. The year to date decrease was also attributable to higher production volumes in the first half of 2020 compared to the same period in 2019.

Transportation Expenses

	Three	months ended	Six r	nonths ended
		June 30		June 30
(\$000s, except per boe amounts)	2020	2019	2020	2019
Transportation expenses	15,386	14,114	30,959	28,124
\$ per boe	2.39	2.20	2.36	2.20

Transportation expenses per boe in the second quarter of 2020 increased nine percent to \$2.39 per boe compared to \$2.20 per boe in the second quarter of 2019. Year to date, transportation expenses increased seven percent to \$2.36 per boe compared to \$2.20 for the same period in 2019. The increases were primarily attributed to increased production weighting in Northwest Alberta & British Columbia ("NABC"), which has higher transportation expenses per boe than the Company average, as well as increased shipping rates in NABC.

Transportation expenses per boe will fluctuate quarterly based on pipeline connectivity or downtime, weather, shipper status and pipeline shipping arrangements. When Whitecap has shipper status, pipeline tariffs incurred by the Company are included in transportation expenses. When Whitecap does not have shipper status, pipeline tariffs incurred by commodity purchasers subsequent to the delivery of the Company's product are charged back to Whitecap and are netted against petroleum and natural gas sales.

Operating Netbacks

The components of operating netbacks are shown below:

	Three m	onths ended	Six n	nonths ended
		June 30		June 30
Netbacks (\$/boe)	2020	2019	2020	2019
Petroleum and natural gas revenues	23.35	58.32	31.60	56.15
Tariffs	(0.42)	(0.43)	(0.44)	(0.50)
Processing & other income	0.95	0.54	0.64	0.53
Marketing revenue	0.59	0.61	0.95	1.24
Petroleum and natural gas sales	24.47	59.04	32.75	57.42
Realized hedging gain (loss)	7.82	(1.81)	5.35	(1.15)
Royalties	(2.02)	(10.96)	(3.96)	(10.14)
Operating expenses	(11.18)	(12.45)	(11.70)	(12.56)
Transportation expenses	(2.39)	(2.20)	(2.36)	(2.20)
Marketing expenses	(0.63)	(0.62)	(0.92)	(1.20)
Operating netbacks (1)	16.07	31.00	19.16	30.17

Note:

General and Administrative ("G&A") Expenses

	Three months ended		Six m	nonths ended
		June 30		June 30
(\$000s, except per boe amounts)	2020	2019	2020	2019
Gross G&A costs	11,762	11,629	23,905	25,184
Recoveries	(3,475)	(3,538)	(8,226)	(7,332)
Capitalized G&A	(3,173)	(1,377)	(4,582)	(4,489)
G&A expenses	5,114	6,714	11,097	13,363
\$ per boe	0.79	1.04	0.85	1.05

Gross G&A costs in the second quarter of 2020 were consistent compared to the same period in 2019. Year to date, the decrease in gross G&A costs is primarily attributed to cost reduction initiatives by the Company in the first half of 2020 due to a record decrease in demand due to the COVID-19 global pandemic, as well as the price and market share war created by Russia and Saudi Arabia.

Recoveries in the second quarter of 2020 were consistent compared to the same period in 2019. Year to date, the increase in recoveries is due to higher capital recoveries as there were higher capital expenditures in the first half of 2020 compared to the same period in 2019.

The increase to capitalized G&A in the second quarter of 2020 compared to the same period in 2019 is primarily attributed to the timing of annual bonus payments, which are capitalized when paid. Year to date, capitalized G&A was consistent compared to the same period in 2019.

G&A expenses per boe in the second quarter of 2020 decreased 24 percent to \$0.79 per boe compared to \$1.04 per boe in the second quarter of 2019. The decrease on a per boe basis is primarily attributed to higher capitalized G&A costs the second quarter of 2020 compared to the same period in 2019. Year to date, G&A expenses per boe decreased 19 percent to \$0.85 per boe compared to \$1.05 per boe for the same period in 2019. The decrease on a per boe basis is primarily attributed to lower gross G&A costs and higher recoveries the first half of 2020 compared to the same period in 2019.

⁽¹⁾ Operating netbacks are a non-GAAP measure which is defined under the Non-GAAP Measures section of this MD&A.

Share-based Awards

	Three m	nonths ended June 30	Six months ended June 30		
(\$000s, except per boe amounts)	2020	2019	2020	2019	
Stock-based compensation	6,689	4,826	4,390	11,588	
Realized loss on equity contracts	4,606	-	4,314	-	
Unrealized (gain) loss on equity contracts	(12,252)	-	17,706	-	
Capitalized stock-based compensation	(1,483)	(1,331)	(1,512)	(3,288)	
Stock-based compensation expenses	(2,440)	3,495	24,898	8,300	
\$ per boe	(0.38)	0.54	1.90	0.65	

The increase in stock-based compensation for the three months ended June 30, 2020, is primarily attributable to an increase in the fair value of cash-settled awards, resulting from an increase to Whitecap's share price in the second quarter of 2020.

The decrease in stock-based compensation and capitalized stock-based compensation for the six months ended June 30, 2020 is primarily attributable to a decrease in the fair value of cash-settled awards, resulting from a decrease to Whitecap's share price in the first half of 2020.

Stock-based compensation will fluctuate with changes to the expected payout multipliers associated with the performance awards, vesting of existing grants, additional grants under the Award Incentive Plan, as well as changes in fair value for awards that are accounted for as cash-settled.

In the three and six months ended June 30, 2020, the unrealized gain and loss, respectively, were the result of changes in share price and additional equity contracts entered in the second guarter of 2020.

Award Incentive Plan

The Company implemented an Award Incentive Plan effective April 30, 2013. The Award Incentive Plan has time-based awards and performance awards which may be granted to directors, officers, employees of the Company and other service providers. Effective January 1, 2017, independent outside directors will receive only time-based awards as the primary form of long-term compensation. As at June 30, 2020, the maximum number of common shares issuable under the plan shall not at any time exceed 3.755 percent of the total common shares outstanding. Vesting is determined by the Company's Board of Directors. Time-based awards and performance awards issued to employees of the Company and independent outside directors have vesting periods ranging from 1 to 3 years.

Each time-based award may in the Company's sole discretion, entitle the holder to be issued the number of common shares designated in the time-based award plus dividend equivalents or payment in cash. Decisions regarding settlement method for insider and non-insider awards are mutually exclusive. On October 1, 2018, consistent with the terms of the Award Incentive Plan, awards vesting for insiders were settled in cash. As a result, the remaining insider awards were accounted for as cash-settled, resulting in the recognition of share award liabilities on the consolidated balance sheet. Performance awards are also subject to a performance multiplier. This multiplier, ranging from zero to two, will be applied on vesting and is dependent on the performance of the Company relative to predefined corporate performance measures set by the Board of Directors for the associated period.

A forfeiture rate is estimated on the grant date and is adjusted to reflect the actual number of awards that vest. Based on the terms of the Award Incentive Plan, the fair value of share awards is equal to the underlying share price on grant date. The fair value of awards that are accounted for as cash-settled transactions are subsequently adjusted to the underlying share price at each period end. Performance awards are also adjusted by an estimated payout multiplier. The resulting stock-based compensation expense is recognized on a straight-line basis over the vesting period, with a corresponding increase to contributed surplus in the case of awards accounted for as equity-settled, or accounts payable and share-based compensation liability in the case of awards accounted for as cash-settled. Upon the vesting of the awards that are accounted for as equity-settled, the associated amount in contributed surplus is recorded as an increase to share capital.

At June 30, 2020, the Company had 8.9 million awards outstanding.

Interest and Financing Expenses

	Three months ended June 30		Six months end June	
(\$000s, except per boe amounts)	2020	2019	2020	2019
Interest	10,525	13,190	22,932	26,944
Realized (gain) loss on interest rate contracts	459	(3)	318	(95)
Unrealized loss on interest rate contracts	1,317	4	11,034	181
Interest and financing expenses	12,301	13,191	34,284	27,030
\$ per boe	1.91	2.05	2.61	2.11

Interest and financing expenses per boe decreased seven percent to \$1.91 per boe in the second quarter of 2020 compared to \$2.05 per boe in the second quarter of 2019. The decrease on a per boe basis was primarily attributable to lower interest rates, partially offset by a higher unrealized loss on interest rate contracts in the second quarter of 2020, which are included in interest and financing expenses, compared to the same period in 2019.

Year to date, interest and financing expenses per boe increased 24 percent to \$2.61 per boe compared to \$2.11 per boe for the same period in 2019. The increase on a per boe basis was primarily attributable to a higher unrealized loss on interest rate contracts, partially offset by lower interest rates in the first half of 2020, compared to the same period in 2019.

Depletion, Depreciation and Amortization ("DD&A")

	Three	months ended	Six n	nonths ended
		June 30		June 30
(\$000s, except per boe amounts)	2020	2019	2020	2019
Depletion, Depreciation and Amortization	80,777	118,838	205,895	235,680
\$ per boe	12.54	18.49	15.68	18.43

DD&A per boe decreased 32 percent to \$12.54 per boe in the second quarter of 2020 compared to \$18.49 per boe in the second quarter of 2019. Year to date, DD&A per boe decreased 15 percent to \$15.68 per boe compared to \$18.43 per boe for the same period in 2019. The decreases on a per boe basis are primarily attributed to a \$2.8 billion impairment to property, plant and equipment ("PP&E") recognized in the first quarter of 2020.

DD&A per boe will fluctuate from one period to the next depending on the amount and type of capital spending, the recognition or reversal of impairments, the amount of reserves added and production volumes. The depletion rates are calculated on proved and probable oil and natural gas reserves, taking into account the future development costs to produce the reserves.

Impairment Expense

			nonths ended	
		June 30		June 30
(\$000s)	2020	2019	2020	2019
PP&E impairment	-	-	2,801,593	-
Goodwill impairment	-	-	122,682	-
Impairment expense	-	-	2,924,275	-

PP&E Impairment

In the six months ended June 30, 2020, the Company determined that carrying amounts of each of the Company's cash generating units exceeded their fair value less cost of disposal ("FVLCD"):

(\$000s)	FVLCD	Carrying Value	Impairment
Northwest Alberta & British Columbia	521,508	1,164,965	643,457
Southeast Saskatchewan	559,345	900,438	341,093
Southwest Saskatchewan	387,844	895,683	507,839
West Central Alberta	549,188	1,287,248	738,060
West Central Saskatchewan	360,167	931,311	571,144
Total	2,378,052	5,179,645	2,801,593

The full amount of the impairment was attributed to PP&E and, as a result, a total impairment loss of \$2.8 billion was recorded in impairment expense. The impairment expense in 2020 was primarily a result of lower forecast benchmark commodity prices at March 31, 2020 compared to December 31, 2019. Additionally, as a result of increased volatility in the market, the after-tax discount rate used to determine the FVLCD increased from 10 percent as at December 31, 2019 to 13 percent as at March 31, 2020. The three percent increase in the after-tax discount rate resulted in the recognition of an additional \$908.3 million in PP&E impairment.

At June 30, 2020, there were no indicators of impairment or impairment reversal.

Goodwill impairment

In the six months ended June 30, 2020, the Company determined that the corporate carrying amount, consisting of PP&E and goodwill net of associated deferred income tax, of \$2.5 billion exceeded the recoverable amount of \$2.4 billion. The full amount of the impairment was attributed to goodwill and, as a result, an impairment loss of \$122.7 million was recorded in impairment expense. The impairment expense in 2020 was primarily a result of lower forecast benchmark commodity prices at March 31, 2020 compared to December 31, 2019.

Taxes

During the three and six months ended June 30, 2020, the Company recognized a deferred income tax recovery of \$25.0 million and \$695.0 million, respectively, compared to a deferred income tax expense of \$24.3 million and \$7.9 million, respectively, for the same periods in 2019. The deferred income tax recovery in the six months ended June 30, 2020 was primarily due to impairments recognized in the period.

The following gross deductions are available for deferred income tax purposes:

	June 30	December 31	
(\$000s)	2020	2019	Annual Deductibility
Undepreciated capital cost	563,334	610,658	Various rates, primarily 25% declining balance
Canadian development expense	706,822	683,907	30% declining balance
Canadian exploration expense	5,064	-	100%
Canadian oil & gas property expense	1,594,657	1,653,727	10% declining balance
Non-capital loss carryforward	865,716	688,645	100%
Share issue costs	6,965	10,714	20% straight line
_Total	3,742,558	3,647,651	

Gain on Acquisition

As part of the acquisition of Hyak Energy ULC ("Hyak"), Whitecap recognized a gain of \$28.1 million for the six months ended June 30, 2020. The gain represents the excess of the \$45.0 million total identifiable net assets acquired over the \$16.9 million cash consideration paid.

Net Income (Loss)

For the three and six months ended June 30, 2020, the Company recognized a net loss of \$78.3 million and \$2.2 billion, respectively, compared to net income of \$58.4 million and \$5.8 million for the same periods in 2019, respectively. The following changes impacted the net income (loss):

	Three months ended	Six months ended
(\$000s)	June 30	June 30
2019 Net Income	58,357	5,796
Increase in impairment expenses	-	(2,924,275)
Decrease in petroleum and natural gas sales	(221,634)	(304,393)
Change in stock-based compensation expenses	5,935	(16,598)
Change in interest and financing expenses	890	(7,254)
Change in deferred income tax recovery	49,287	702,905
Change in risk management contracts	(75,460)	205,081
Decrease in royalties	57,403	77,672
Change in depletion, depreciation and amortization	38,061	29,785
Change in gain on acquisition	-	28,131
Decrease in operating expenses	7,959	7,037
Change in marketing expenses	(52)	3,346
Other net changes	969	3,008
2020 Net Loss	(78,285)	(2,189,759)

The factors causing these changes are discussed in the preceding sections.

Cash Flow from Operating Activities, Funds Flow and Payout Ratios

Management considers funds flow to be a key measure of operating performance as it demonstrates Whitecap's ability to generate the cash necessary to pay dividends, repay debt, make capital investments, and/or to repurchase common shares under the Company's normal course issuer bid ("NCIB"). Management believes that by excluding the temporary impact of changes in non-cash operating working capital, funds flow provides a useful measure of Whitecap's ability to generate cash that is not subject to short-term movements in non-cash operating working capital. Funds flow is not a standardized measure and, therefore, may not be comparable with the calculation of similar measures by other entities.

Whitecap reports funds flow in total and on a per share basis. Refer to Note 5(e) "Capital Management" in the Company's unaudited interim consolidated financial statements for the three and six months ended June 30, 2020.

The following table reconciles cash flow from operating activities to funds flow and free funds flow:

	Three mo	onths ended June 30	Six months ended June 30		
(\$000s)	2020	2019	2020	2019	
Cash flow from operating activities	64,167	198,246	224,662	335,098	
Changes in non-cash working capital	13,967	(22,709)	(14,751)	1,660	
Funds flow (1)	78,134	175,537	209,911	336,758	
Expenditures on PP&E	21,301	26,463	160,098	151,367	
Free funds flow (2)	56,833	149,074	49,813	185,391	
Dividends paid or declared	17,448	34,686	52,354	68,152	
Basic payout ratio (%) (2)	22	20	25	20	
Total payout ratio (%) (2)	50	35	101	65	
Funds flow per share, basic	0.19	0.42	0.51	0.81	
Funds flow per share, diluted	0.19	0.42	0.51	0.81	
Dividends paid or declared per share	0.04	0.08	0.13	0.17	

Notes:

⁽¹⁾ Refer to Note 5(e) "Capital Management" in the unaudited interim consolidated financial statements.

⁽²⁾ Free funds flow, basic payout ratio and total payout ratio are non-GAAP measures which are defined under the Non-GAAP Measures section of this MD&A.

Dividends are only declared once they are approved by the Company's Board of Directors. The Board of Directors reviews Whitecap's dividend policy on a monthly basis.

Cash flow from operating activities for the three and six months ended June 30, 2020, was \$64.2 million and \$224.7 million, respectively, compared to \$198.2 million and \$335.1 million for the same periods in 2019.

The following changes impacted cash flow from operating activities:

	Three months ended	Six months ended
(\$000s)	June 30	June 30
2019 Cash flow from operating activities	198,246	335,098
Change in net income/ loss	(136,642)	(2,195,555)
Change in deferred income tax recovery	(49,287)	(702,905)
Change in unrealized risk management contracts	126,560	(91,644)
Change in depletion, depreciation and amortization	(38,061)	(29,785)
Change in gain on acquisition	-	(28,131)
Change in impairment expenses	-	2,924,275
Net change in non-cash working capital items	(36,676)	16,411
Other net changes	27	(3,102)
2020 Cash flow from operating activities	64,167	224,662

Funds flow for the three and six months ended June 30, 2020, was \$78.1 million and \$209.9, respectively, compared to \$175.5 million and \$336.8 million for the same periods in 2019. The decreases in funds flow is primarily attributed to lower commodity prices.

Free funds flow for the three and six months ended June 30, 2020, was \$56.8 million and \$49.8 million, respectively, compared to \$149.1 million and \$185.4 million for the same periods in 2019. The decrease in free funds flow is primarily attributed to lower funds flow.

Capital Expenditures

	Three m	onths ended	Six months ended		
		June 30		June 30	
(\$000s)	2020	2019	2020	2019	
Land and geological	419	274	689	3,590	
Drilling and completions	10,751	18,603	134,840	122,649	
Investment in facilities	6,888	5,974	19,706	20,237	
Capitalized administration	3,173	1,377	4,582	4,489	
Corporate and other assets	70	235	281	402	
Expenditures on PP&E	21,301	26,463	160,098	151,367	
Property acquisitions	5,208	196	5,284	1,586	
Property dispositions	-	44	-	(623)	
Corporate acquisition	-	-	18,149	-	
Total capital expenditures	26,509	26,703	183,531	152,330	

For the second quarter of 2020, expenditures on PP&E totaled \$21.3 million with 83 percent spent on drilling, completions and facilities.

For the three and six months ended June 30, 2020, Whitecap's drilling activity was as follows:

	Three mont June	hs ended 30, 2020	Six months ended June 30, 2020		
	Gross	Net	Gross	Net	
Northwest Alberta & British Columbia	-	-	12	7.2	
Southeast Saskatchewan (1)	-	-	9	5.5	
Southwest Saskatchewan (2)	-	-	22	13.5	
West Central Alberta (3)	-	-	6	5.2	
West Central Saskatchewan (4)	-	-	30	25.5	
Total	-	-	79	56.9	

Notes:

- (1) Includes 2 (1.2 net) injection wells in the six months ended June 30, 2020.
- (2) Includes 2 (1.8 net) injection wells in the six months ended June 30, 2020.
- (3) Includes 1 (0.9 net) injection well in the six months ended June 30, 2020.
- (4) Includes 3 (3.0 net) injection wells in the six months ended June 30, 2020.

For the three and six months ended June 30, 2019, Whitecap's drilling activity was as follows:

	Three months ended June 30, 2019		Six months ended June 30, 2019	
	Gross	Net	Gross	Net
Northwest Alberta & British Columbia	1	0.1	6	5.1
Southwest Saskatchewan (1)	4	2.8	21	16.5
West Central Alberta (2)	2	1.7	13	12.2
West Central Saskatchewan (3)	-	-	23	22.9
Total	7	4.6	63	56.7

Notes:

- (1) Includes 2 (1.2 net) and 3 (1.7 net) injection wells in the three and six months ended June 30, 2019, respectively.
- (2) Includes 3 (2.6 net) injection wells in the six months ended June 30, 2019.
- (3) Includes 2 (2.0 net) injection wells in the six months ended June 30, 2019.

Corporate Acquisition

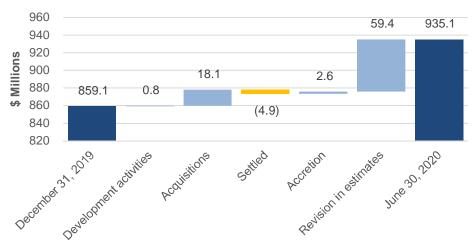

On January 15, 2020, the Company completed the acquisition of all of the issued and outstanding common shares of Hyak for \$16.2 million in cash, net of acquired working capital.

Decommissioning Liability

At June 30, 2020, the Company's decommissioning liability balance was \$935.1 million (\$859.1 million at December 31, 2019) for future abandonment and reclamation of the Company's properties. The increase in the decommissioning liability at June 30, 2020 compared to December 31, 2019 is primarily attributed to revisions in estimates as a result of a decrease in the risk-free rate from 1.8 percent at December 31, 2019 to 1.0 percent at June 30, 2020. Estimates are based on both operational knowledge of the properties and updated industry guidance provided by the Alberta Energy Regulator and the Saskatchewan Ministry of the Economy. The estimates are reviewed quarterly and adjusted as new information regarding the liability is determined.

Exhibit 5

Capital Resources and Liquidity

Credit Facilities

At June 30, 2020, the Company had a \$1.175 billion credit facility with a syndicate of banks. The credit facility consists of a \$1.1 billion revolving syndicated facility and a \$75 million revolving operating facility, with a maturity date of May 31, 2023. As at June 30, 2020 the amount drawn on the credit facilities was \$651.7 million. Prior to any anniversary date, being May 31 of each year, Whitecap may request an extension of the then current maturity date, subject to approval by the banks. Following the granting of such extension, the term to maturity of the credit facilities shall not exceed four years. The credit facility provides that advances may be made by way of direct advances, banker's acceptances or letters of credit/guarantees. The credit facility bears interest at the bank's prime lending or bankers' acceptance rates plus applicable margins. The applicable margin charged by the bank is dependent upon the Company's debt to earnings before interest, taxes, depreciation and amortization ("EBITDA") ratio for the most recent quarter. The bankers' acceptances bear interest at the applicable banker's acceptance rate plus an explicit stamping fee based upon the Company's debt to EBITDA ratio. The credit facilities are secured by a floating charge debenture on the assets of the Company.

The following table lists Whitecap's financial covenants as at June 30, 2020:

Covenant Description		June 30, 2020
	Maximum Ratio	
Debt to EBITDA (1) (2)	4.00	2.04
	Minimum Ratio	
EBITDA to interest expense (1)	3.50	12.73

Notes:

At June 30, 2020, the Company was compliant with all covenants provided for in the credit agreement. Copies of the Company's credit agreements may be accessed through the SEDAR website (www.sedar.com).

Senior Secured Notes

At June 30, 2020, the Company had issued \$595 million senior secured notes. The notes rank equally with Whitecap's obligations under its credit facility.

⁽¹⁾ The EBITDA used in the covenant calculation is adjusted for non-cash items, transaction costs and extraordinary and non-recurring items such as material acquisitions or dispositions.

⁽²⁾ The debt used in the covenant calculation includes bank indebtedness, letters of credit, and dividends declared.

The terms, rates and principals of the Company's outstanding senior notes are detailed below:

(\$0	000)s)
(Ψ)	,,,	\sim

Issue Date	Maturity Date	Coupon Rate	Principal
January 5, 2017	January 5, 2022	3.46%	200,000
May 31, 2017	May 31, 2024	3.54%	200,000
December 20, 2017	December 20, 2026	3.90%	195,000
Balance at June 30, 2020			595,000

The senior secured notes are subject to the same debt to EBITDA ratio and EBITDA to interest expense ratio described under the credit facility. At June 30, 2020, the Company was compliant with all covenants provided for in the lending agreements.

Equity

On May 16, 2018, the Company announced the approval of its renewed NCIB by the TSX (the "2018 NCIB"). The 2018 NCIB allowed the Company to purchase up to 20,864,806 common shares over a period of twelve months commencing on May 18, 2018.

On May 16, 2019, the Company announced the approval of its renewed NCIB by the TSX (the "2019 NCIB"). The 2019 NCIB allows the Company to purchase up to 20,657,914 common shares over a period of twelve months commencing on May 21, 2019.

On May 14, 2020, the Company announced the approval of its renewed NCIB by the TSX (the "2020 NCIB"). The 2020 NCIB allows the Company to purchase up to 20,406,799 common shares over a period of twelve months commencing on May 21, 2020.

Purchases are made on the open market through the TSX or alternative platforms at the market price of such common shares. All common shares purchased under the NCIB are cancelled. The total cost paid, including commissions and fees, is first charged to share capital to the extent of the average carrying value of Whitecap's common shares and the excess is charged to contributed surplus.

The following table summarizes the share repurchase activities during the period:

	Three months ended		Six months ended	
		June 30	June	
(000s except per share amounts)	2020	2019	2020	2019
Shares repurchased	1,000	1,076	2,634	1,076
Average cost (\$/share)	2.30	4.64	3.87	4.64
Amounts charged to				
Share capital	2,302	4,996	10,197	4,996
Share repurchase cost	2,302	4,996	10,197	4,996

The Company is authorized to issue an unlimited number of common shares. At July 28, 2020, there were 408.2 million common shares and 8.9 million share awards outstanding.

Liquidity

The Company generally relies on funds flow, equity issuances and its credit facility to fund its capital requirements, dividend payments and provide liquidity. From time to time, the Company accesses capital markets to meet its additional financing needs and to maintain flexibility in funding its capital programs. Future liquidity depends primarily on funds flow, existing credit facilities and the ability to access debt and equity markets. All repayments on the revolving production and operating facilities are due at the term maturity date. As none of the facilities mature within the next year, the liabilities are considered to be non-current. At June 30, 2020, the Company had \$523.3 million of unutilized credit to cover any working capital deficiencies. The Company believes that available credit facilities combined with anticipated funds flow will be sufficient to satisfy Whitecap's 2020 development capital program and dividend payments for the 2020 fiscal year.

Contractual Obligations

Whitecap has contractual obligations in the normal course of business which may include purchase of assets and services, operating agreements, transportation commitments, sales commitments, royalty obligations, lease rental obligations, employee agreements and debt. These obligations are of a recurring, consistent nature and impact Whitecap's cash flows in an ongoing manner. The Company is committed to future payments under the following agreements:

(\$000s)	2020	2021	2022	2023+	Total
Lease liabilities (1)	7,087	14,459	14,780	50,936	87,262
Service agreements	985	1,968	1,966	9,584	14,503
Transportation agreements	18,618	20,971	28,170	137,861	205,620
CO ₂ purchase commitments	19,280	39,011	39,791	101,341	199,423
Long-term debt (1)	10,891	21,605	214,761	1,085,354	1,332,611
Total	56,861	98,014	299,468	1,385,076	1,839,419

Note:

Related Party Transactions

The Company has retained the law firm of Burnet, Duckworth & Palmer LLP ("BD&P") to provide Whitecap with legal services. A director of Whitecap is a partner of this firm. During the three and six months ended June 30, 2020, the Company incurred \$0.1 million and \$0.3 million for legal fees and disbursements, respectively (nil and \$0.1 million for the three and six months ended June 30, 2019, respectively). These amounts have been recorded at the amounts that have been agreed upon by the two parties. The Company expects to retain the services of BD&P from time to time. At June 30, 2020, no accounts payable amount (nil – June 30, 2019) was outstanding.

Changes in Accounting Policies Including Initial Adoption

There were no changes that had a material effect on the reported loss or net assets of the Company.

Standards Issued but not yet Effective

There are no other standards or interpretations issued, but not yet adopted, that are anticipated to have a material effect on the reported net loss or net assets of the Company.

Off Balance Sheet Arrangements

The Company does not have any special purpose entities nor is it party to any arrangements that would be excluded from the balance sheet other than commitments disclosed in Note 18 to the Company's unaudited interim consolidated financial statements for the three and six months ended June 30, 2020.

Critical Accounting Estimates

Whitecap's financial and operating results may incorporate certain estimates including:

- estimated revenues, royalties and operating expenses on production as at a specific reporting date but for which actual revenues and expenses have not yet been received;
- estimated capital expenditures on projects that are in progress;
- estimated depletion, depreciation and accretion that are based on estimates of oil and gas reserves
 that the Company expects to recover in the future, commodity prices, estimated future salvage
 values and estimated future capital costs;
- estimated fair values of derivative contracts that are subject to fluctuation depending upon the underlying commodity prices and foreign exchange rates;
- estimated value of decommissioning liabilities that are dependent upon estimates of future costs, timing of expenditures and the risk-free rate;
- estimated income and other tax liabilities requiring interpretation of complex laws and regulations. All tax filings are subject to audit and potential reassessment after the lapse of considerable time;
- estimated stock-based compensation expense using the Black-Scholes option pricing model;
- estimated fair value of business combinations and goodwill requires management to make assumptions and estimates about future events. The assumptions and estimates with respect to determining the fair value of PP&E and exploration and evaluation assets acquired generally

⁽¹⁾ These amounts include the notional principal and interest payments.

- require the most judgment and include estimates of reserves acquired, forecast benchmark commodity prices and discount rates; and
- estimated recoverable amounts are based on estimated proved plus probable reserves, production rates, oil and gas prices, future costs, discount rates and other relevant assumptions.

The Company has hired individuals and consultants who have the skills required to make such estimates and ensures that individuals or departments with the most knowledge of the activity are responsible for the estimates. Furthermore, past estimates are reviewed and compared to actual results, and actual results are compared to budgets in order to make more informed decisions on future estimates.

Business Risks

Whitecap's exploration and production activities are concentrated in the Western Canadian Sedimentary Basin, where activity is highly competitive and includes a variety of different-sized companies. Whitecap is subject to a number of risks that are also common to other organizations involved in the oil and gas industry. Such risks include finding and developing oil and gas reserves at economic costs, estimating amounts of recoverable reserves, production of oil and gas in commercial quantities, marketability of oil and gas produced, fluctuations in commodity prices, stock market volatility, debt service which may limit timing or amount of dividends as well as market price of shares, financial and liquidity risks and environmental and safety risks.

In order to reduce exploration risk, Whitecap employs or contracts highly qualified and motivated professionals who have demonstrated the ability to generate quality proprietary geological and geophysical prospects.

Whitecap has retained an independent engineering consulting firm that assists the Company in evaluating recoverable amounts of oil and gas reserves. Values of recoverable reserves are based on a number of variable factors and assumptions such as commodity prices, projected production, future production costs and government regulations. Such estimates may vary from actual results.

The Company mitigates its risk related to producing hydrocarbons through the utilization of current technology and information systems. In addition, Whitecap strives to operate the majority of its prospects, thereby maintaining operational control. When the Company does not operate, it relies on its partners in jointly owned properties to maintain operational control.

Whitecap is exposed to market risk to the extent that the demand for oil and gas produced by the Company exists within Canada and the United States. External factors beyond the Company's control may affect the marketability of oil and gas produced. These factors include commodity prices and variations in the Canada—United States currency exchange rate which, in turn responds to economic and political circumstances throughout the world. Oil prices are affected by worldwide supply and demand fundamentals while natural gas prices are affected by North American supply and demand fundamentals. Whitecap uses futures and options contracts to hedge its exposure to the potential adverse impact of commodity price volatility. The primary objective of the risk management program is to provide a measure of stability to Whitecap dividends and its capital development program.

Exploration and production for oil and gas is capital intensive. In addition to funds flow, the Company accesses the equity markets as a source of new capital. In addition, Whitecap utilizes bank financing to support ongoing capital investments which exposes the Company to fluctuations in interest rates on its bank debt. Funds flow also fluctuates with changing commodity prices. Equity and debt capital are subject to market conditions, and availability may increase or decrease from time to time.

The Company's business, operations and financial condition has been significantly adversely affected by COVID-19. Actions taken to reduce the spread of COVID-19 have resulted in volatility and disruptions in regular business operations, supply chains and financial markets, as well as declining trade and market sentiment. COVID-19 as well as other factors have resulted in the deepest drop in crude oil prices that global markets have seen since 1991. With the rapid spread of COVID-19 and additional oil supply expected to come on-stream over the near term, oil prices and global equity markets have deteriorated significantly and are expected to remain under pressure. The extreme supply / demand imbalance is anticipated to cause a reduction in industry spending in 2020. These events and conditions have caused a significant decrease in the valuation of oil and natural gas companies and a decrease in confidence in the oil and

natural gas industry. COVID-19 also poses a risk on the financial capacity of Whitecap's contract counterparties and potentially their ability to perform contractual obligations. These difficulties have been exacerbated in Canada by political and other actions resulting in uncertainty surrounding regulatory, tax, royalty changes and environmental regulation.

On March 17, 2020, in response to market conditions and the sharp decline in global commodity prices, the Company announced the first phase of its responses. On April 30, 2020, Company announced the second phase of its responses. Copies of the press releases may be accessed through the SEDAR website (www.sedar.com).

Total cash reductions identified for 2020 from our phase one and phase two actions have totaled approximately \$300 million. The cost reduction efforts on operating, general & administrative and royalty expenses are ongoing. In addition, our projected capital plans and dividend payments provide us with additional cash management levers which could be used to allow us to navigate through the current challenging environment.

Additional information regarding risk factors including, but not limited to, business risks is available in our Annual Information Form for the year ended December 31, 2019, a copy of which may be accessed through the SEDAR website (www.sedar.com).

Environmental Risks

General Risks

Oil and gas exploration and production can involve environmental risks such as litigation, physical and regulatory risks. Physical risks include the pollution of the environment, climate change and destruction of natural habitat, as well as safety risks such as personal injury. The Company works hard to identify the potential environmental impacts of its new projects in the planning stage and during operations. The Company conducts its operations with high standards in order to protect the environment, its employees and consultants, and the general public. Whitecap maintains current insurance coverage for comprehensive and general liability as well as limited pollution liability. The amount and terms of this insurance are reviewed on an ongoing basis and adjusted as necessary to reflect current corporate requirements, as well as industry standards and government regulations. Without such insurance, and if the Company becomes subject to environmental liabilities, the payment of such liabilities could reduce or eliminate its available funds or could exceed the funds the Company has available and result in financial distress.

Climate Change Risks

Our exploration and production facilities and other operations and activities emit greenhouse gasses ("GHG") which may require us to comply with federal and/or provincial GHG emissions legislation. Climate change policy is evolving at regional, national and international levels, and political and economic events may significantly affect the scope and timing of climate change measures that are ultimately put in place to prevent climate change or mitigate our effects. The direct or indirect costs of compliance with GHG-related regulations may have a material adverse effect on our business, financial condition, results of operations and prospects. Some of our significant facilities may ultimately be subject to future regional, provincial and/or federal climate change regulations to manage GHG emissions. In addition, climate change has been linked to long-term shifts in climate patterns and extreme weather conditions both of which pose the risk of causing operational difficulties.

Additional information regarding risk factors including, but not limited to, environmental risks is available in our Annual Information Form for the year ended December 31, 2019, a copy of which may be accessed through the SEDAR website (www.sedar.com).

Summary of Quarterly Results

Note:

Over the past eight quarters, fluctuations in production volumes and realized commodity prices have impacted the Company's petroleum and natural gas revenues and funds flow. Net income (loss) has fluctuated due to changes in funds flow, impairment expense and unrealized derivative gains and losses which fluctuate with the changes in forward commodity prices and exchange rates. Capital expenditures and production volumes have fluctuated over time as a result of the timing of acquisitions and the impact of market conditions on the Company's development capital expenditures.

The following outlines the significant events over the past eight quarters:

In the first quarter of 2020, due to the weak crude oil prices, the Company reduced its expected 2020 capital spending program from \$350 - \$370 million to \$200 - \$210 million and reduced its monthly dividend per share from \$0.0285 to \$0.01425, in order to strengthen its financial position. Additionally, as a result of lower forecast benchmark commodity prices at March 31, 2020 compared to December 31, 2019, the Company recognized impairments of \$2.9 billion, of which \$2.8 billion was attributed to PP&E and \$0.1 billion was attributed to goodwill.

In 2019, the Company reduced capital spending compared to the prior year with the focus on further strengthening the balance sheet by reducing net debt. As a result of the decreased capital program, production volumes were slightly lower than the prior year.

In the fourth quarter of 2019, the Company recognized an impairment of \$296.9 million attributed to PP&E. The impairment expense in 2019 was primarily a result lower forecast benchmark commodity prices at December 31, 2019 compared to December 31, 2018.

⁽¹⁾ Refer to Note 5(e) "Capital Management" in the financial statements and to the section entitled "Cash Flow from Operating Activities, Funds Flow and Payout Ratios " contained within this MD&A.

In the fourth quarter of 2018, the Company recognized an impairment of \$219.3 million attributed to PP&E. The impairment expense was primarily a result of negative technical revisions in reserves assigned due to well performance at December 31, 2018 compared to December 31, 2017. Additionally, in the fourth quarter of 2018, there was increased volatility with a decrease in the WTI benchmark price and wider Canadian crude oil price differentials that negatively impacted petroleum and natural gas revenues and funds flow.

INTERNAL CONTROLS UPDATE

Whitecap is required to comply with National Instrument 52-109 Certification of Disclosure on Issuers' Annual and Interim Filings ("NI 52-109"). NI 52-109 requires that Whitecap disclose in its interim MD&A any material weaknesses in Whitecap's internal control over financial reporting and/or any changes in Whitecap's internal control over financial reporting that occurred during the period that have materially affected, or are reasonably likely to materially affect, Whitecap's internal controls over financial reporting. Whitecap confirms that no material weaknesses or such changes were identified in Whitecap's internal controls over financial reporting during the second quarter of 2020.

NON-GAAP MEASURES

This MD&A includes non-GAAP measures as further described herein. These non-GAAP measures do not have a standardized meaning prescribed by IFRS and, therefore, may not be comparable with the calculation of similar measures by other companies. Management believes that the presentation of these non-GAAP measures provides useful information to investors and shareholders as the measures provide increased transparency and the ability to better analyze performance against prior periods on a comparable basis.

"Basic payout ratio" is calculated as dividends paid or declared divided by funds flow. Management believes that basic payout ratio provides a useful measure of Whitecap's dividend policy and the amount of funds flow retained by the Company for capital reinvestment.

"Free funds flow" represents funds flow less expenditures on PP&E. Management believes that free funds flow provides a useful measure of Whitecap's ability to increase returns to shareholders and to grow the Company's business. Previously, Whitecap also deducted dividends paid or declared in the calculation of free funds flow. The Company believes the change in presentation better allows comparison with both dividend paying and non-dividend paying peers.

"Operating netbacks" are determined by adding marketing revenue and processing & other income, deducting realized hedging losses or adding realized hedging gains and deducting tariffs, royalties, operating expenses, transportation expenses and marketing expenses from petroleum and natural gas revenues. Operating netbacks are per boe measures used in operational and capital allocation decisions. Presenting operating netbacks on a per boe basis allows management to better analyze performance against prior periods on a comparable basis.

"Total payout ratio" is calculated as dividends paid or declared plus expenditures on PP&E, divided by funds flow. Management believes that total payout ratio provides a useful measure of Whitecap's capital reinvestment and dividend policy, as a percentage of the amount of funds flow.

BOE PRESENTATION

Boe means barrel of oil equivalent. All boe conversions in this MD&A are derived by converting gas to oil at the ratio of six thousand cubic feet ("Mcf") of natural gas to one barrel ("Bbl") of oil. Boe may be misleading, particularly if used in isolation. A Boe conversion rate of 1 Bbl : 6 Mcf is based on an energy equivalency conversion method primarily applicable at the burner tip and does not represent a value equivalency at the wellhead. Given that the value ratio of oil compared to natural gas based on currently prevailing prices is significantly different than the energy equivalency ratio of 1 Bbl : 6 Mcf, utilizing a conversion ratio of 1 Bbl : 6 Mcf may be misleading as an indication of value.

FORWARD-LOOKING INFORMATION AND STATEMENTS

Certain statements contained in this MD&A constitute forward-looking statements and are based on Whitecap's beliefs and assumptions based on information available at the time the assumption was made. By its nature, such forward-looking information involves known and unknown risks, uncertainties and other factors that may cause actual results or events to differ materially from those anticipated in such forward-looking statements. The Company believes the expectations reflected in those forward-looking statements are reasonable, but no assurance can be given that these expectations will prove to be correct and such forward-looking statements should not be unduly relied upon.

This MD&A contains certain forward-looking information and statements within the meaning of applicable securities laws. The use of any of the words "expect", "anticipate", "estimate", "objective", "ongoing", "may", "will", "project", "believe", "measure", "stability", "depends", "could", "sustainability" and similar expressions are intended to identify forward-looking information or statements. In particular, but without limiting the foregoing, this MD&A contains forward-looking information and statements pertaining to the following: Whitecap's focus and strategy; Whitecap's commodity risk management program and the benefits to be derived therefrom; management's belief that funds flow is a useful measure; the amount of future decommissioning liabilities; future liquidity and financial capacity; sources of funding the Company's capital program; transportation expenses, stock-based compensation expenses; Whitecap's ability to fund its current development capital program and dividend payments for 2020; Whitecap's deductions available for deferred income tax purposes and the terms of Whitecap's future contractual obligations..

The forward-looking information and statements contained in this MD&A reflect several material factors and expectations and assumptions of Whitecap including, without limitation: that Whitecap will continue to conduct its operations in a manner consistent with past operations; the general continuance or improvement in current industry conditions; the continuance of existing (and in certain circumstances, the implementation of proposed) tax, royalty and regulatory regimes; the impact (and the duration thereof) that the COVID-19 pandemic will have on (i) the demand for crude oil, NGLs and natural gas, (ii) our supply chain, including our ability to obtain the equipment and services we require, and (iii) our ability to produce, transport and/or sell our crude oil, NGLs and natural gas; the ability of OPEC+ nations and other major producers of crude oil to reduce crude oil production and thereby arrest and reverse the steep decline in world crude oil prices; the accuracy of the estimates of Whitecap's reserve volumes; the impact of increasing competition; the general stability of the economic and political environment in which Whitecap operates; the ability of Whitecap to obtain qualified staff, equipment and services in a timely and cost efficient manner; drilling results; the ability of the operator of the projects which the Company has an interest in to operate in a safe, efficient and effective manner; field production and decline rates; the ability to reduce operating costs; the ability to replace and expand oil and natural gas reserves through acquisition, development or exploration; the timing and costs of pipeline, storage and facility construction and expansion; the ability of the Company to secure adequate product transportation; future petroleum and natural gas prices; currency, exchange and interest rates; the continued availability of adequate debt and equity financing and cash flow to fund Whitecap's planned expenditures: and the ability to maintain dividends. Whitecap believes the material factors, expectations and assumptions reflected in the forward-looking information and statements are reasonable, but no assurance can be given that these factors, expectations and assumptions will prove to be correct.

The forward-looking information and statements included in this MD&A are not guarantees of future performance and should not be unduly relied upon. Such information and statements involve known and unknown risks, uncertainties and other factors that may cause actual results or events to differ materially from those anticipated in such forward-looking information or statements including, without limitation: changes in commodity prices; changes in the demand for or supply of Whitecap's products; impact of the COVID-19 pandemic and the ability of the company to carry on operations as contemplated in light of the COVID-19 pandemic; determinations by OPEC and other countries as to production levels; unanticipated operating results or production declines; changes in tax or environmental laws, royalty rates or other regulatory matters; changes in Whitecap's development plans or by third party operators of Whitecap's properties; competition from other producers; inability to retain drilling rigs and other services; incorrect assessment of the value of acquisitions; failure to realize the anticipated benefits of acquisitions; delays resulting from or inability to obtain required regulatory approvals; increased debt levels or debt service requirements; inaccurate estimation of Whitecap's oil and gas reserve volumes; limited, unfavourable or a lack of access to capital markets; increased costs; a lack of adequate insurance coverage; the impact of competitors; and certain other risks detailed from time to time in Whitecap's public disclosure documents

(including, without limitation, those risks identified in this MD&A) and may be accessed through the SEDAR website (www.sedar.com).

The forward-looking information and statements contained in this MD&A speak only as of the date of this MD&A, and Whitecap does not assume any obligation to publicly update or revise them to reflect new events or circumstances, except as may be required pursuant to applicable laws.
