

MANAGEMENT'S DISCUSSION AND ANALYSIS

For the three months and years ended

December 31, 2022 and 2021

MANAGEMENT'S DISCUSSION AND ANALYSIS

The following management's discussion and analysis ("**MD&A**") of financial condition and results of operations for Whitecap Resources Inc. (the "**Company**" or "**Whitecap**") is dated February 21, 2023 and should be read in conjunction with the Company's audited annual consolidated financial statements and related notes for the year ended December 31, 2022, and our Annual Information Form for the year ended December 31, 2022. These audited annual consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("**IFRS**"), in Canadian dollars, except where indicated otherwise. Accounting policies adopted by the Company are set out in the notes to the audited annual consolidated financial statements for the year ended December 31, 2022. The audited annual consolidated financial statements of Whitecap have been prepared by management and approved by the Company's Board of Directors. The MD&A should also be read in conjunction with Whitecap's disclosure under "Forward-Looking Information and Statements" below. Additional information respecting Whitecap, is available on the SEDAR website (www.sedar.com) and on our website (www.wcap.ca).

DESCRIPTION OF BUSINESS

Whitecap is a Calgary based oil and gas company that is engaged in the business of acquiring, developing and holding interests in petroleum and natural gas properties and assets. Whitecap's common shares are traded on the Toronto Stock Exchange ("**TSX**") under the symbol WCP.

2022 STRATEGIC ACQUISITIONS AND DISPOSITIONS

TimberRock Energy Corp.

On January 10, 2022, the Company closed the TimberRock Energy Corp. ("**TimberRock**") acquisition. Whitecap acquired all the issued and outstanding common shares of TimberRock for consideration consisting of 12.4 million Whitecap common shares and \$205.8 million in cash.

XTO Energy Canada

On August 31, 2022, the Company closed the XTO Energy Canada ("**XTO**") acquisition. Whitecap acquired XTO for total cash consideration of \$1.9 billion.

Assets Held for Sale

On December 19, 2022, the Company entered into three definitive agreements to sell its non-core assets. The designated assets have been reclassified as held for sale, and the associated decommissioning liability has been reclassified to current liabilities as at December 31, 2022. An impairment loss of \$93.4 million was recorded on the assets classified as held for sale as their carrying amount exceeded their fair value less cost of disposal ("**FVLCD**").

2021 STRATEGIC ACQUISITIONS AND DISPOSITIONS

NAL Resources Limited

On January 4, 2021, the Company closed the NAL Resources Limited ("**NAL**") acquisition. Whitecap issued 58.3 million Whitecap common shares to the Manufacturers Life Insurance Company in exchange for all the issued and outstanding NAL shares.

TORC Oil & Gas Ltd.

On February 24, 2021, the Company closed the TORC Oil & Gas Ltd. ("**TORC**") acquisition. Whitecap issued 129.8 million Whitecap common shares to former TORC shareholders in exchange for all the issued and outstanding TORC shares and the assumption of net debt.

Kicking Horse Oil & Gas Ltd.

On May 14, 2021, the Company closed the Kicking Horse Oil & Gas Ltd. ("**Kicking Horse**") acquisition. Whitecap acquired all the issued and outstanding common shares of Kicking Horse for consideration consisting of 34.5 million Whitecap common shares, \$56.2 million in cash, and the assumption of net debt.

HighRock Resources Ltd.

On July 2, 2021, the Company closed the HighRock Resources Ltd. ("**HighRock**") acquisition. Whitecap acquired all the issued and outstanding common shares of HighRock for consideration consisting of 3.6 million Whitecap common shares and \$44.4 million in cash.

MANAGEMENT'S DISCUSSION AND ANALYSIS

Other Acquisitions

In the year ended December 31, 2021, the Company also acquired assets for total cash consideration of \$72.1 million, consisting of certain production facilities in the Central Alberta and Western Saskatchewan cash generating units ("CGU") that were previously leased.

Additionally, in the year ended December 31, 2021, the Company closed the acquisitions of various assets located in its Eastern Saskatchewan, Western Saskatchewan and Central Alberta CGUs for consideration consisting of \$58.7 million of cash consideration, \$2.4 million of other non-cash consideration and 2.7 million Whitecap common shares, valued at \$19.5 million.

Weyburn Royalty Sale

On October 26, 2021, the Company closed the sale of a newly formed five percent gross overriding royalty on its working interest in the Weyburn Unit for cash proceeds of \$186.0 million, net of transaction costs, to Topaz Energy Corp. The sale resulted in a gain of \$17.6 million and a deferred gain of \$57.6 million that were recognized in the Company's audited annual consolidated financial statements for the year ended December 31, 2021.

For more information on the Company's strategic acquisitions and dispositions, refer to Note 6 "Acquisitions" and Note 14 "Deferred Gain", in the Company's audited annual consolidated financial statements for the year ended December 31, 2022.

2022 ANNUAL FINANCIAL AND OPERATIONAL RESULTS

Production

Whitecap's average production volumes and commodity splits were as follows:

	Three months ended December 31,		Year ended December 31,	
	2022	2021	2022	2021
Crude oil (bbls/d) ⁽¹⁾	91,812	79,315	86,417	75,387
NGLs (bbls/d) ⁽¹⁾	17,473	10,568	15,521	10,418
Natural gas (Mcf/d) ⁽¹⁾	342,640	180,820	254,708	158,501
Total (boe/d) ⁽²⁾	166,392	120,020	144,389	112,222

Notes:

⁽¹⁾ "Crude oil" refers to light and medium crude oil, tight oil, and condensate combined. "NGLs" refers to ethane, propane, butane and pentane combined. "Natural gas" refers to conventional natural gas and shale gas combined. For further breakdown of crude oil and natural gas production volumes refer to the "Product Type Information" section of this MD&A.

⁽²⁾ Disclosure of production on a per boe basis in this MD&A consists of the constituent product types and their respective quantities disclosed in the "Product Type Information" section of this MD&A. Also refer to the "Boe Presentation" section of this MD&A.

Exhibit 1

Production Split
Three Months Ended December 31,

■ Crude oil ■ NGLs ■ Natural gas

Production Split
Year Ended December 31,

■ Crude oil ■ NGLs ■ Natural gas

MANAGEMENT'S DISCUSSION AND ANALYSIS

Average production volumes increased 39 percent to 166,392 boe/d in the fourth quarter of 2022 from 120,020 boe/d in the fourth quarter of 2021. The increase in production in the fourth quarter of 2022 was primarily due to the XTO acquisition completed in the third quarter of 2022. For the year ended December 31, 2022, average production volumes increased 29 percent to 144,389 boe/d from 112,222 boe/d in 2021. The increase in production in the year ended December 31, 2022 was primarily due to a full year of production from acquisitions completed in 2021, acquisitions completed in 2022 and the Company's ongoing successful drilling activities, partially offset by natural declines.

Crude oil and NGLs weighting in the three months and year ended December 31, 2022 were 66 percent and 71 percent, respectively, compared to 75 percent and 76 percent in the three months and year ended December 31, 2021, respectively. The lower crude oil and NGLs weighting in the three months and year ended December 31, 2022 compared to the same periods in 2021 are primarily due to the assets acquired from XTO and TimberRock, and additional drilling in the Montney during 2022 which have a higher natural gas weighting than the 2021 Company average.

Petroleum and Natural Gas Sales

A breakdown of petroleum and natural gas sales is as follows:

(\$ millions)	Three months ended December 31,		Year ended December 31,	
	2022	2021	2022	2021
Crude oil	865.8	652.4	3,617.3	2,143.5
NGLs	75.3	50.8	313.3	156.5
Natural gas	175.4	82.6	522.3	226.3
Petroleum and natural gas revenues	1,116.5	785.8	4,452.9	2,526.3
Tariffs	(7.5)	(5.3)	(24.1)	(17.6)
Processing & other income	11.8	7.5	35.9	30.5
Marketing revenue	90.8	47.9	315.7	154.8
Petroleum and natural gas sales	1,211.6	835.9	4,780.4	2,694.0

Exhibit 2

Petroleum and Natural Gas Revenues
Three Months Ended December 31,

■ Crude oil ■ NGLs ■ Natural gas

Petroleum and Natural Gas Revenues
Year Ended December 31,

■ Crude oil ■ NGLs ■ Natural gas

Petroleum and natural gas revenues in the fourth quarter of 2022 increased 42 percent to \$1.1 billion from \$0.8 billion in the fourth quarter of 2021. The increase of \$0.3 billion consists of \$0.1 billion attributed to higher realized prices and \$0.2 billion attributed to higher production volumes. For the year ended December 31, 2022, petroleum and natural gas revenues increased 76 percent to \$4.5 billion from \$2.5 billion in 2021. The increase of \$2.0 billion consists of \$1.4 billion attributed to higher realized prices and \$0.6 billion attributed to higher production volumes.

MANAGEMENT'S DISCUSSION AND ANALYSIS

Benchmark and Realized Prices

Average benchmark and realized prices are as follows:

	Three months ended December 31,		Year ended December 31,	
	2022	2021	2022	2021
Average benchmark prices				
WTI (US\$/bbl) ⁽¹⁾	82.64	77.19	94.23	67.92
Exchange rate (US\$/C\$)	1.36	1.26	1.30	1.25
WTI (C\$/bbl)	112.22	97.20	122.38	85.11
MSW Par at Edmonton (\$/bbl) ⁽²⁾	110.13	93.15	120.09	80.08
Fosterton Par at Regina (\$/bbl)	81.17	83.84	102.57	74.24
Midale Par at Cromer (\$/bbl)	106.94	95.75	119.75	83.92
LSB Par at Cromer (\$/bbl) ⁽³⁾	108.46	94.34	119.97	81.36
AECO natural gas (\$/Mcf) ⁽⁴⁾	5.11	4.66	5.31	3.62
Average realized prices ⁽⁵⁾				
Crude oil (\$/bbl) ⁽⁶⁾	102.50	89.40	114.68	77.90
NGLs (\$/bbl) ⁽⁶⁾	46.84	52.24	55.30	41.16
Natural gas (\$/Mcf) ⁽⁶⁾	5.56	4.97	5.62	3.91
Petroleum and natural gas revenues (\$/boe) ⁽⁶⁾	72.94	71.17	84.49	61.68

Notes:

- (1) WTI represents the calendar month average of West Texas Intermediate oil.
- (2) Mixed Sweet Blend ("MSW").
- (3) Light Sour Blend ("LSB").
- (4) AECO represents the AECO 5A Daily Index price.
- (5) Prior to the impact of risk management activities and tariffs.
- (6) Supplementary financial measure. Refer to the "Supplementary Financial Measures" section of this MD&A for more information.

Exhibit 3

Crude Oil Sales by Index
Three Months Ended December 31,

Crude Oil Sales by Index
Year Ended December 31,

Whitecap's weighted average realized price prior to the impact of risk management activities and tariffs increased two percent to \$72.94 per boe in the fourth quarter of 2022 compared to \$71.17 per boe in the fourth quarter of 2021. For the year ended December 31, 2022, Whitecap's weighted average realized price prior to the impact of hedging activities and tariffs increased 37 percent to \$84.49 per boe compared to \$61.68 per boe in 2021.

MANAGEMENT'S DISCUSSION AND ANALYSIS

Crude Oil

The WTI price increased by seven percent to average US\$82.64 per barrel in the fourth quarter of 2022 compared to US\$77.19 per barrel in the fourth quarter of 2021. The WTI price increased by 39 percent to average US\$94.23 per barrel in the year ended December 31, 2022 compared to US\$67.92 per barrel for the year ended December 31, 2021. The increases are primarily due to the increasing crude oil demand in 2022 coupled with the impact of material supply disruptions, prolonged reduced capital investment into supply and geopolitical factors.

Northern Alberta & British Columbia and Central Alberta

The Company's realized crude oil prices in Northern Alberta & British Columbia and Central Alberta are based on the MSW par at Edmonton. The MSW par oil price increased by 18 percent to average \$110.13 per barrel in the fourth quarter of 2022 compared to \$93.15 per barrel in the fourth quarter of 2021. The MSW par oil price increased 50 percent to average \$120.09 per barrel in the year ended December 31, 2022 compared to \$80.08 per barrel in the year ended December 31, 2021. The increases are primarily due to strong WTI crude price performance and the MSW differential improving 48 percent in the fourth quarter of 2022 and 54 percent in the year ended December 31, 2022, compared to the same periods in 2021. Refinery demand for light crude oil was exceptionally high resulting in additional differential strength in 2022.

Western Saskatchewan

The Company's realized crude oil price in the West Central Saskatchewan region is based on the MSW par at Edmonton, discussed above.

The Company's realized crude oil price in the Southwest Saskatchewan region is based on the Fosterton par price at Regina. The Fosterton par price decreased three percent to average \$81.17 per barrel in the fourth quarter of 2022 compared to \$83.84 per barrel in the fourth quarter of 2021. The decrease is primarily due to the increase in supply of heavy sour crude in the United States Gulf Coast and the release of stored crude oil from the U.S. government's Strategic Petroleum Reserve into the market which weakened the underlying Western Canadian Select differential compared to the same period in 2021. The Fosterton par price increased 38 percent to average \$102.57 per barrel in the year ended December 31, 2022 compared to \$74.24 per barrel for the year ended December 31, 2021. The increase was driven by the higher WTI pricing.

Eastern Saskatchewan

The Company's realized crude oil price in the Weyburn region is based on the Midale par price at Cromer. The Midale par price increased 12 percent to average \$106.94 per barrel in the fourth quarter of 2022 compared to \$95.75 per barrel in the fourth quarter of 2021. The Midale par price increased 43 percent to average \$119.75 per barrel in the year ended December 31, 2022 compared to \$83.92 per barrel for the year ended December 31, 2021. The increases are primarily due to higher WTI prices.

The Company's realized crude oil prices in the South-Central Saskatchewan and Southeast Saskatchewan regions are based on the LSB par price at Cromer. The LSB oil price increased 15 percent to average \$108.46 per barrel in the fourth quarter of 2022 compared to \$94.34 per barrel in the fourth quarter of 2021. The LSB oil price increased 47 percent to average \$119.97 per barrel in the year ended December 31, 2022 compared to \$81.36 per barrel for the year ended December 31, 2021. The increases are primarily due to higher WTI prices and increased refinery demand.

Natural Gas Liquids

The natural gas liquids realized price decreased ten percent to average \$46.84 per barrel in the fourth quarter of 2022 compared to \$52.24 per barrel in the fourth quarter of 2021. The decrease is primarily due to propane pricing which decreased by 35 percent compared to the same period in 2021. The natural gas liquids realized price increased 34 percent to average \$55.30 per barrel in the year ended December 31, 2022 compared to \$41.16 per barrel for the year ended December 31, 2021. The increase is primarily due to higher benchmark base pricing for propane, butane, and pentane in the first half of 2022.

MANAGEMENT'S DISCUSSION AND ANALYSIS

Natural Gas

The AECO daily spot price increased ten percent to average \$5.11 per Mcf in the fourth quarter of 2022 compared to an average of \$4.66 per Mcf in the fourth quarter of 2021. The AECO daily spot price increased 47 percent to average \$5.31 per Mcf in the year ended December 31, 2022 compared to \$3.62 per Mcf for the year ended December 31, 2021. The increases are primarily due to higher global and domestic demand, as well as geopolitical factors.

Risk Management

Whitecap maintains an ongoing risk management program to reduce the volatility of revenues in order to fund capital expenditures and pay cash dividends to shareholders.

The Company incurred a realized loss of \$21.9 million and \$245.5 million on its commodity risk management contracts for the three months and year ended December 31, 2022, respectively.

The unrealized gains and losses are a result of the non-cash change in the mark-to-market values period over period. The significant assumptions made in determining the fair value of financial instruments are disclosed in Note 4 to the Company's audited annual consolidated financial statements for the year ended December 31, 2022.

Risk Management Contracts (\$ millions)	Three months ended December 31,		Year ended December 31,	
	2022	2021	2022	2021
Realized loss on commodity contracts	(21.9)	(89.8)	(245.5)	(243.3)
Unrealized gain (loss) on commodity contracts	19.0	92.9	67.3	(50.9)
Net gain (loss) on commodity contracts	(2.9)	3.1	(178.2)	(294.2)
Realized gain (loss) on interest rate contracts ⁽¹⁾	2.8	(1.0)	3.6	(3.4)
Unrealized gain on interest rate contracts ⁽¹⁾	-	5.0	19.4	10.1
Realized gain on equity contracts ⁽²⁾	5.2	2.9	20.4	6.2
Unrealized gain (loss) on equity contracts ⁽²⁾	(2.4)	(0.1)	(7.4)	10.2
Net gain (loss) on risk management contracts	2.7	9.9	(142.2)	(271.1)

Notes:

⁽¹⁾ The gains (losses) on interest rate risk management contracts are included in interest and financing expenses.

⁽²⁾ The gains (losses) on equity contracts are included in stock-based compensation expenses.

Exhibit 4

MANAGEMENT'S DISCUSSION AND ANALYSIS

At December 31, 2022, the following risk management contracts were outstanding with an asset fair market value of \$55.2 million and a liability fair market value of \$49.3 million:

WTI Crude Oil Derivative Contracts

Type	Remaining Term	Volume (bbls/d)	Bought Put Price (C\$/bbl) ⁽¹⁾	Sold Call Price (C\$/bbl) ⁽¹⁾	Swap Price (C\$/bbl) ⁽¹⁾
Swap	Jan - Jun 2023	1,000			80.00
Swap	Jul - Dec 2023	1,000			82.02
Swap	Jan - Dec 2023	1,000			95.05
Collar	Jan - Jun 2023	5,500	72.27	99.56	
Collar	Jul - Dec 2023	3,000	76.67	101.85	
Collar	Jan - Dec 2023	3,000	71.67	100.22	
Collar	Jan - Dec 2024	5,000	82.00	116.98	

Note:

⁽¹⁾ Prices reported are the weighted average prices for the period.

Natural Gas Derivative Contracts

Type	Remaining Term	Volume (GJ/d)	Bought Put Price (C\$/GJ) ⁽¹⁾	Sold Call Price (C\$/GJ) ⁽¹⁾	Swap Price (C\$/GJ) ⁽¹⁾
Swap	Jan - Mar 2023	55,000			5.88
Swap	Apr - Oct 2023	70,000			3.88
Swap	Jan - Dec 2024	10,000			4.02
Collar	Jan - Dec 2023	14,000	3.32	6.13	

Note:

⁽¹⁾ Prices reported are the weighted average prices for the period.

Interest Rate Contracts

Type	Term	Amount (\$ millions)	Fixed Rate (%) ⁽¹⁾	Index ⁽²⁾	
Swap	Aug 6, 2019	Aug 6, 2024	200.0	1.5540	CDOR
Swap	May 5, 2021	May 5, 2025	200.0	1.2315	CDOR

Notes:

⁽¹⁾ Rates reported are the weighted average rates for the period.

⁽²⁾ Canadian Dollar Offered Rate ("CDOR").

Equity Derivative Contracts

Type	Remaining Term	Notional Amount (\$ millions) ⁽¹⁾	Share Volume (millions)	
Swap	Oct 1, 2022	Oct 1, 2023	2.1	1.0

Note:

⁽¹⁾ Notional amount is calculated as the share volume for the period multiplied by the weighted average prices for the period.

Contracts entered into subsequent to December 31, 2022

Power Derivative Contracts

Type	Remaining Term	Volume (MWh)	Fixed Rate (\$/MWh)
Swap	Mar - Dec 2023	36,720	124.00
Swap	Jan - Dec 2024	43,920	99.00

MANAGEMENT'S DISCUSSION AND ANALYSIS

Royalties

(\$ millions, except per boe amounts)	Three months ended December 31,		Year ended December 31,	
	2022	2021	2022	2021
Royalties	204.2	144.5	861.8	415.9
As a % of petroleum and natural gas revenues ⁽¹⁾	18.3	18.4	19.4	16.5
\$ per boe ⁽¹⁾	13.34	13.09	16.35	10.15

Note:

⁽¹⁾ Supplementary financial measure. Refer to the "Supplementary Financial Measures" section of this MD&A for more information.

Royalties as a percentage of petroleum and natural gas revenues were consistent at 18.3 percent in the fourth quarter of 2022 compared to 18.4 percent in the fourth quarter of 2021. In the year ended December 31, 2022, royalties as a percentage of petroleum and natural gas revenues were 19.4 percent compared to 16.5 percent in 2021. The increase in royalties as a percentage of petroleum and natural gas revenues in the year ended December 31, 2022, was primarily attributable to increases in commodity prices compared to 2021.

Whitecap pays royalties to the provincial governments and mineral owners in Alberta, Saskatchewan, Manitoba and British Columbia. Each province has separate royalty regimes which impact Whitecap's overall corporate royalty rate.

Operating Expenses

(\$ millions, except per boe amounts)	Three months ended December 31,		Year ended December 31,	
	2022	2021	2022	2021
Operating expenses	216.3	149.0	766.3	556.3
\$ per boe ⁽¹⁾	14.13	13.49	14.54	13.58

Note:

⁽¹⁾ Supplementary financial measure. Refer to the "Supplementary Financial Measures" section of this MD&A for more information.

Operating expenses per boe in the fourth quarter of 2022 increased five percent to \$14.13 per boe compared to \$13.49 per boe in the fourth quarter of 2021. The increase is primarily due to the XTO acquisition completed in the third quarter of 2022 and the impact of inflationary pressures on other cost categories.

In the year ended December 31, 2022, operating expenses increased seven percent to \$14.54 per boe compared to \$13.58 per boe in 2021. The increase in operating expenses per boe in the year ended December 31, 2022 is primarily attributable to increased turnaround and workover activities, higher power costs, as well as the impact of inflationary pressures on other cost categories.

Transportation Expenses

(\$ millions, except per boe amounts)	Three months ended December 31,		Year ended December 31,	
	2022	2021	2022	2021
Transportation expenses	32.5	23.4	114.8	90.2
\$ per boe ⁽¹⁾	2.12	2.12	2.18	2.20

Note:

⁽¹⁾ Supplementary financial measure. Refer to the "Supplementary Financial Measures" section of this MD&A for more information.

Transportation expenses per boe in the three months and year ended December 31, 2022 remained generally consistent compared to the same periods in 2021.

Transportation expenses per boe will fluctuate quarterly based on pipeline connectivity or downtime, weather, shipper status and pipeline shipping arrangements. When Whitecap has shipper status, pipeline tariffs incurred by the Company are included in transportation expenses. When Whitecap does not have shipper status, pipeline tariffs incurred by commodity purchasers subsequent to the delivery of the Company's product are charged back to Whitecap and are netted against petroleum and natural gas sales.

MANAGEMENT'S DISCUSSION AND ANALYSIS

Marketing Revenues and Expenses

(\$ millions, except per boe amounts)	Three months ended December 31,		Year ended December 31,	
	2022	2021	2022	2021
Marketing revenues	90.8	47.9	315.7	154.8
\$ per boe ⁽¹⁾	5.93	4.33	5.99	3.78
Marketing expenses	89.8	48.0	313.0	155.8
\$ per boe ⁽¹⁾	5.87	4.34	5.94	3.80

Note:

⁽¹⁾ Supplementary financial measure. Refer to the "Supplementary Financial Measures" section of this MD&A for more information.

Marketing revenues and expenses per boe in the fourth quarter of 2022 increased 37 percent and 35 percent, respectively, compared to the fourth quarter of 2021. For the year ended December 31, 2022, marketing revenues and expenses per boe increased 58 percent and 56 percent, respectively, compared to 2021. The increases in marketing revenues and expenses are attributable to higher pricing and volumes related to purchases of third-party volumes for resale and blending activities. Marketing activities will fluctuate, and may occur when there is a sufficiently large variance between crude oil sales stream prices and where there is both sufficient facility and pipeline capacity.

Operating Netbacks

"Operating netback" is a non-GAAP financial measure determined by adding marketing revenues and processing & other income, deducting realized losses on commodity risk management contracts or adding realized gains on commodity risk management contracts and deducting tariffs, royalties, operating expenses, transportation expenses and marketing expenses from petroleum and natural gas revenues. The most directly comparable financial measure to operating netback disclosed in the primary financial statements is petroleum and natural gas sales. Operating netback is a measure used in operational and capital allocation decisions. Operating netback is not a standardized financial measure under IFRS and, therefore, may not be comparable with the calculation of similar financial measures disclosed by other entities.

The components of operating netbacks are shown below:

Operating Netbacks (\$ millions)	Three months ended December 31,		Year ended December 31,	
	2022	2021	2022	2021
Petroleum and natural gas revenues	1,116.5	785.8	4,452.9	2,526.3
Tariffs	(7.5)	(5.3)	(24.1)	(17.6)
Processing & other income	11.8	7.5	35.9	30.5
Marketing revenues	90.8	47.9	315.7	154.8
Petroleum and natural gas sales	1,211.6	835.9	4,780.4	2,694.0
Realized loss on commodity contracts	(21.9)	(89.8)	(245.5)	(243.3)
Royalties	(204.2)	(144.5)	(861.8)	(415.9)
Operating expenses	(216.3)	(149.0)	(766.3)	(556.3)
Transportation expenses	(32.5)	(23.4)	(114.8)	(90.2)
Marketing expenses	(89.8)	(48.0)	(313.0)	(155.8)
Operating netbacks	646.9	381.2	2,479.0	1,232.5

"Operating netback per boe" is a non-GAAP ratio calculated by dividing operating netbacks by the total production for the period. Operating netback is a non-GAAP financial measure component of operating netback per boe. Operating netback per boe is not a standardized financial measure under IFRS and, therefore, may not be comparable with the calculation of similar financial measures disclosed by other entities. Presenting operating netback on a per boe basis allows management to better analyze performance against prior periods on a comparable basis.

MANAGEMENT'S DISCUSSION AND ANALYSIS

The components of operating netbacks per boe are shown below:

Operating Netbacks (\$ per boe)	Three months ended December 31,		Year ended December 31,	
	2022	2021	2022	2021
Petroleum and natural gas revenues ⁽¹⁾	72.94	71.17	84.49	61.68
Tariffs ⁽¹⁾	(0.49)	(0.48)	(0.46)	(0.43)
Processing & other income ⁽¹⁾	0.77	0.68	0.68	0.74
Marketing revenues ⁽¹⁾	5.93	4.33	5.99	3.78
Petroleum and natural gas sales ⁽¹⁾	79.15	75.70	90.70	65.77
Realized loss on commodity contracts ⁽¹⁾	(1.43)	(8.13)	(4.66)	(5.94)
Royalties ⁽¹⁾	(13.34)	(13.09)	(16.35)	(10.15)
Operating expenses ⁽¹⁾	(14.13)	(13.49)	(14.54)	(13.58)
Transportation expenses ⁽¹⁾	(2.12)	(2.12)	(2.18)	(2.20)
Marketing expenses ⁽¹⁾	(5.87)	(4.34)	(5.94)	(3.80)
Operating netbacks	42.26	34.53	47.03	30.10

Note:

⁽¹⁾ Supplementary financial measure. Refer to the "Supplementary Financial Measures" section of this MD&A for more information.

General and Administrative Expenses

(\$ millions, except per boe amounts)	Three months ended December 31,		Year ended December 31,	
	2022	2021	2022	2021
Gross G&A costs	25.5	19.0	89.9	69.5
Recoveries	(8.1)	(5.3)	(26.1)	(17.9)
Capitalized G&A	(2.1)	(2.6)	(11.2)	(10.6)
G&A expenses	15.3	11.1	52.6	41.0
\$ per boe ⁽¹⁾	1.00	1.00	1.00	1.00

Note:

⁽¹⁾ Supplementary financial measure. Refer to the "Supplementary Financial Measures" section of this MD&A for more information.

General and administrative ("**G&A**") expenses per boe in the three months and year ended December 31, 2022 remained consistent compared to the same periods in 2021.

The increases in gross G&A costs in the three months and year ended December 31, 2022 compared to the same periods in 2021 are primarily due to additional personnel and office related expenses as a result of the acquisitions completed in 2021 and 2022.

The increases in recoveries in the three months and year ended December 31, 2022 are primarily due to higher capital expenditures in the three months and year ended December 31, 2022 compared to the same periods in 2021.

Capitalized G&A in the three months and year ended December 31, 2022 remained relatively consistent compared to the same periods in 2021.

MANAGEMENT'S DISCUSSION AND ANALYSIS

Stock-based Compensation Expense

(\$ millions, except per boe amounts)	Three months ended December 31,		Year ended December 31,	
	2022	2021	2022	2021
Stock-based compensation	11.8	8.7	56.1	45.1
Realized gain on equity contracts	(5.2)	(2.9)	(20.4)	(6.2)
Unrealized (gain) loss on equity contracts	2.4	0.1	7.4	(10.2)
Capitalized stock-based compensation	(2.3)	(1.6)	(11.4)	(9.4)
Stock-based compensation expenses	6.7	4.3	31.7	19.3
\$ per boe ⁽¹⁾	0.44	0.39	0.60	0.47

Note:

⁽¹⁾ Supplementary financial measure. Refer to the "Supplementary Financial Measures" section of this MD&A for more information.

In the three months and year ended December 31, 2022, the Company recorded stock-based compensation of \$11.8 million and \$56.1 million, respectively, compared to \$8.7 million and \$45.1 million in the same periods in 2021, respectively.

The increases in stock-based compensation and capitalized stock-based compensation for the three months and year ended December 31, 2022 compared to the same periods in 2021 are primarily due to higher share prices in 2022 compared to 2021.

Stock-based compensation will fluctuate with changes to the expected payout multipliers associated with the performance awards, vesting of existing grants, additional grants under the Award Incentive Plan, as well as changes in fair value for awards that are accounted for as cash-settled.

Higher realized gain on equity contracts in the three months and year ended December 31, 2022 were primarily due to a higher share price relative to contracted prices at the time of contract settlement compared to the same periods in 2021. Unrealized losses on equity contracts in the three months and year ended December 31, 2022 resulted from the settlement of contracts in 2022.

Award Incentive Plan

The Award Incentive Plan has time-based awards and performance awards which may be granted to directors, officers, employees of the Company and other service providers. Independent outside directors receive only time-based awards as the primary form of long-term compensation. As at December 31, 2022, the maximum number of common shares issuable under the plan shall not at any time exceed 3.755 percent of the total common shares outstanding. Vesting is determined by the Company's Board of Directors. Time-based awards and performance awards issued to employees of the Company and independent outside directors have vesting periods ranging from 1 to 3 years. A copy of the Company's Award Incentive Plan may be accessed through the SEDAR website (www.sedar.com).

Each time-based award may, in the Company's sole discretion, entitle the holder to be issued the number of common shares designated in the time-based award plus dividend equivalents or payment in cash. Decisions regarding settlement method for insider and non-insider awards are mutually exclusive. Performance awards are also subject to a performance multiplier. This multiplier, ranging from zero to two, will be applied on vesting and is dependent on the performance of the Company relative to predefined corporate performance measures set by the Board of Directors for the associated period.

MANAGEMENT'S DISCUSSION AND ANALYSIS

A forfeiture rate is estimated on the grant date and is adjusted to reflect the actual number of awards that vest. Based on the terms of the Award Incentive Plan, the fair value of share awards is equal to the underlying share price on grant date. The fair value of awards that are accounted for as cash-settled transactions are subsequently adjusted to the underlying share price at each period end. Performance awards are also adjusted by an estimated payout multiplier. The resulting stock-based compensation expense is recognized on a straight-line basis over the vesting period, with a corresponding increase to contributed surplus in the case of awards accounted for as equity-settled, or share awards liability in the case of awards accounted for as cash-settled. Upon the vesting of the awards that are accounted for as equity-settled, the associated amount in contributed surplus is recorded as an increase to share capital. At December 31, 2022, the Company had 6.2 million awards outstanding.

Interest and Financing Expenses

(\$ millions, except per boe amounts)	Three months ended December 31,		Year ended December 31,	
	2022	2021	2022	2021
Interest	28.1	10.1	62.9	43.6
Realized (gain) loss on interest rate contracts	(2.8)	1.0	(3.6)	3.4
Unrealized gain on interest rate contracts	-	(5.0)	(19.4)	(10.1)
Interest and financing expenses	25.3	6.1	39.9	36.9
\$ per boe ⁽¹⁾	1.65	0.55	0.76	0.90

Note:

⁽¹⁾ Supplementary financial measure. Refer to the "Supplementary Financial Measures" section of this MD&A for more information.

Interest and financing expenses per boe increased 200 percent to \$1.65 per boe in the fourth quarter of 2022 compared to \$0.55 per boe in the fourth quarter of 2021. The increase on a per boe basis was primarily attributable to higher interest rates and higher average debt levels, which was partially offset by higher production volumes in the three months ended December 31, 2022 compared to the same period in 2021.

For the year ended December 31, 2022, interest and financing expenses per boe decreased 16 percent to \$0.76 per boe compared to \$0.90 per boe in 2021. The decrease on a per boe basis was primarily attributable to higher production volumes and higher unrealized gains, which was partially offset by higher interest rates in 2022.

Depletion, Depreciation and Amortization

(\$ millions, except per boe amounts)	Three months ended December 31,		Year ended December 31,	
	2022	2021	2022	2021
Depletion, depreciation and amortization	224.3	165.8	806.5	546.0
\$ per boe ⁽¹⁾	14.65	15.01	15.30	13.33

Note:

⁽¹⁾ Supplementary financial measure. Refer to the "Supplementary Financial Measures" section of this MD&A for more information.

Depletion, depreciation, and amortization ("**DD&A**") per boe decreased two percent to \$14.65 per boe in the fourth quarter of 2022 compared to \$15.01 per boe in the fourth quarter of 2021. The decrease was primarily due to assets acquired from XTO which have a lower depletion rate than the Company average.

For the year ended December 31, 2022, DD&A per boe increased 15 percent to \$15.30 per boe compared to \$13.33 per boe in 2021. The increase was primarily attributable to net reversal of impairment on property, plant, and equipment ("**PP&E**") recognized in the third quarter of 2021 and in the first quarter of 2022.

DD&A per boe will fluctuate from one period to the next depending on the amount and type of capital spending, the recognition or reversal of impairments, the amount of reserves added and production volumes. The depletion rates are calculated on proved and probable oil and natural gas reserves, taking into account the future development costs to produce the reserves.

MANAGEMENT'S DISCUSSION AND ANALYSIS

Impairment Expense (Reversal)

(\$ millions)	Three months ended December 31,		Year ended December 31,	
	2022	2021	2022	2021
Impairment reversal	(30.8)	-	(660.5)	(1,851.2)

March 31, 2022 Impairment Reversal

At March 31, 2022, the Company determined that the FVLCD of each of the Company's CGUs with impairment losses recognized in prior periods that were not subsequently fully reversed exceeded their carrying amounts:

(\$ millions)	FVLCD	Carrying Value	Impairment Reversal ⁽¹⁾
Central Alberta	1,881.7	1,601.3	(280.4)
Western Saskatchewan	1,736.0	1,386.7	(349.3)
Total	3,617.7	2,988.0	(629.7)

Note:

⁽¹⁾ The impairment recovery is limited to a maximum of the estimated depleted historical cost if the impairment had not been recognized.

The full amount of impairment reversal was attributed to PP&E and, as a result, a total impairment reversal of \$629.7 million was recorded in the Consolidated Statement of Comprehensive Income in the first quarter of 2022. The impairment reversal was primarily a result of higher forecast benchmark commodity prices at March 31, 2022 compared to December 31, 2021.

December 31, 2022 Impairment Expense and Reversal

At December 31, 2022: (1) as a result of an increase in forward benchmark commodity prices compared to March 31, 2022, an impairment reversal test on the Company's Central Alberta CGU was performed; and, (2) as a result of negative technical revisions in reserves at December 31, 2022, compared to March 31, 2022, an impairment test on the Company's Western Saskatchewan CGU was performed.

The impairment (reversal) test at December 31, 2022 concluded: (1) that the FVLCD of the Company's Central Alberta CGU of \$1.6 billion exceeded its carrying amount of \$1.4 billion; and, (2) that the carrying amount of the Company's Western Saskatchewan CGU of \$1.5 billion exceeded its FVLCD of \$1.4 billion.

(\$ millions)	FVLCD	Carrying Value	Impairment Expense (Reversal) ⁽¹⁾
Central Alberta	1,623.3	1,379.2	(243.0)
Western Saskatchewan	1,425.7	1,544.5	118.8
Total	3,049.0	2,923.7	(124.2)

Note:

⁽¹⁾ The impairment recovery is limited to a maximum of the estimated depleted historical cost if the impairment had not been recognized.

The full amount of the net impairment reversal was attributed to PP&E and, as a result, a net impairment reversal of \$124.2 million was recorded in the Consolidated Statement of Comprehensive Income. The impairment reversal in the Company's Central Alberta CGU was primarily a result of higher forecast benchmark commodity prices, and the impairment in the Company's Western Saskatchewan CGU was primarily a result of negative technical revisions in reserves. At December 31, 2022, the impairment amounts that can be reversed in future periods for the Company's Western Saskatchewan CGU, net of depletion, had no impairment loss been recognized in prior periods, is \$254.0 million. All other previous impairments for the remaining CGUs have been fully reversed.

December 31, 2022 Impairment Expense on Assets Held for Sale

A \$93.4 million impairment loss was recorded on the assets classified as held for sale as their carrying amount exceeded their FVLCD.

MANAGEMENT'S DISCUSSION AND ANALYSIS

Taxes

During the three months and year ended December 31, 2022, the Company recognized deferred income tax expenses of \$95.1 million and \$548.5 million, respectively, compared to deferred income tax expenses of \$74.7 million and \$595.5 million, respectively, for the same periods in 2021. The increase in deferred income tax expense for the three months ended December 31, 2022 compared to the same period in 2021 is primarily due to higher net income as a result of the XTO acquisition in the third quarter of 2022 and net impairment reversal in the fourth quarter of 2022. The decrease in deferred income tax expense for the year ended December 31, 2022 compared to 2021 is primarily due to significant prior year impairment reversal impacting the year ended December 31, 2021.

The following gross deductions are available for deferred income tax purposes:

(\$ millions)	December 31, 2022	December 31, 2021	Annual Deductibility
Undepreciated capital cost	980.8	697.7	Primarily 25% declining balance
Canadian exploration expense	142.6	-	100%
Canadian development expense	975.8	896.3	30% declining balance
Canadian oil and gas property expense	1,778.2	1,899.3	10% declining balance
Non-capital loss carry forward	498.5	1,578.2	100%
Share issue costs	0.5	0.7	20% straight line
Total	4,376.4	5,072.2	

Net Income and Other Comprehensive Income

For the three months and year ended December 31, 2022 the Company recognized net income of \$0.3 billion and \$1.7 billion, respectively, compared to net income of \$0.2 billion and \$1.8 billion, respectively, for the same periods in 2021. The following changes impacted the net income:

Exhibit 5

MANAGEMENT'S DISCUSSION AND ANALYSIS

The factors causing these changes are discussed in the preceding sections.

Cash Flow from Operating Activities, Funds Flow and Payout Ratios

"Funds flow", "funds flow per share, basic" and "funds flow per share, diluted" are capital management measures and are key measures of operating performance as they demonstrate Whitecap's ability to generate the cash necessary to pay dividends, repay debt, make capital investments, and/or to repurchase common shares under the Company's normal course issuer bid ("NCIB"). Management believes that by excluding the temporary impact of changes in non-cash operating working capital, funds flow, funds flow per share, basic and funds flow per share, diluted provide useful measures of Whitecap's ability to generate cash that are not subject to short-term movements in non-cash operating working capital. Whitecap reports funds flow in total and on a per share basis (basic and diluted), which is calculated by dividing funds flow by the weighted average number of shares (basic and diluted) outstanding for the relevant period. See Note 5(e)(ii) "Capital Management – Funds Flow" in the Company's audited annual consolidated financial statements for the year ended December 31, 2022 for a detailed calculation.

"Free funds flow" is a non-GAAP financial measure calculated as funds flow less expenditures on PP&E. Management believes that free funds flow provides a useful measure of Whitecap's ability to increase returns to shareholders and to grow the Company's business. Free funds flow is not a standardized financial measure under IFRS and, therefore, may not be comparable with the calculation of similar financial measures disclosed by other entities. The most directly comparable financial measure to free funds flow disclosed in the primary financial statements is cash flow from operating activities.

"Basic payout ratio" is a supplementary financial measure calculated as dividends declared divided by funds flow. Management believes that basic payout ratio provides a useful measure of Whitecap's dividend policy and the amount of funds flow retained by the Company for capital reinvestment.

"Total payout ratio" is a supplementary financial measure calculated as dividends declared plus expenditures on PP&E, divided by funds flow. Management believes that total payout ratio provides a useful measure of Whitecap's capital reinvestment and dividend policy, as a percentage of the amount of funds flow.

MANAGEMENT'S DISCUSSION AND ANALYSIS

The following table reconciles cash flow from operating activities to funds flow and free funds flow:

(\$ millions)	Three months ended		Year ended	
	2022	December 31, 2021	2022	December 31, 2021
Cash flow from operating activities	555.8	329.2	2,183.1	1,124.0
Net change in non-cash working capital items	37.8	21.4	139.7	(25.3)
Funds flow ⁽¹⁾	593.6	350.6	2,322.8	1,098.7
Expenditures on PP&E	179.0	135.0	686.5	428.5
Free funds flow	414.6	215.6	1,636.3	670.2
Dividends declared	67.2	42.3	237.2	126.1
Basic payout ratio (%)	11	12	10	11
Total payout ratio (%)	41	51	40	50
Funds flow per share, basic ⁽¹⁾	0.97	0.56	3.77	1.84
Funds flow per share, diluted ⁽¹⁾	0.97	0.55	3.74	1.82
Dividends paid or declared per share	0.11	0.07	0.39	0.21

Note:

⁽¹⁾ Refer to Note 5(e)(ii) "Capital Management - Funds Flow" to the Company's audited annual consolidated financial statements for the year ended December 31, 2022.

Dividends are only declared once they are approved by the Company's Board of Directors. The Board of Directors reviews Whitecap's dividend payment on a monthly basis.

Cash flow from operating activities for the three months and year ended December 31, 2022 were \$0.6 billion and \$2.2 billion, respectively, compared to \$0.3 billion and \$1.1 billion for the same periods in 2021. The following changes impacted cash flow from operating activities:

Exhibit 6

MANAGEMENT'S DISCUSSION AND ANALYSIS

Funds flow for the three months and year ended December 31, 2022 was \$0.6 billion and \$2.3 billion, respectively, compared to \$0.4 billion and \$1.1 billion for the same periods in 2021. The increases in funds flow are primarily attributed to higher commodity prices and higher production volumes compared to the same periods in 2021.

Free funds flow for the three months and year ended December 31, 2022 was \$0.4 billion and \$1.6 billion, respectively, compared to \$0.2 billion and \$0.7 billion for the same periods in 2021. The increases in free funds flow are primarily attributed to higher funds flow, which were partly offset by higher capital expenditures.

Expenditures on Property, Plant and Equipment

(\$ millions)	Three months ended		Year ended	
	2022	2021	2022	2021
Land and geological	4.8	0.9	7.9	2.8
Drilling and completions	141.6	95.2	544.7	315.1
Investment in facilities	29.6	34.1	117.3	96.1
Capitalized administration	2.1	2.6	11.2	10.5
Corporate and other assets	0.9	2.2	5.4	4.0
Expenditures on property, plant and equipment	179.0	135.0	686.5	428.5

For the fourth quarter of 2022, expenditures on property, plant and equipment totaled \$179.0 million with 96 percent spent on drilling, completions and facilities. For the year ended December 31, 2022, expenditures on PP&E totaled \$686.5 million with 96 percent spent on drilling, completions and facilities.

MANAGEMENT'S DISCUSSION AND ANALYSIS

For the three months and year ended December 31, 2022, Whitecap's drilling activity was as follows:

	Three months ended December 31, 2022		Year ended December 31, 2022	
	Gross	Net	Gross	Net
Northern Alberta & British Columbia	11	8.5	34	28.7
Central Alberta	6	3.0	23	18.7
Saskatchewan	33	23.7	157	126.0
Total	50	35.2	214	173.4

For the three months and year ended December 31, 2021, Whitecap's drilling activity was as follows:

	Three months ended December 31, 2021		Year ended December 31, 2021	
	Gross	Net	Gross	Net
Northern Alberta & British Columbia	11	6.7	24	16.1
Central Alberta	3	2.5	19	14.3
Saskatchewan	30	25.0	110	90.3
Total	44	34.2	153	120.6

Decommissioning Liability

At December 31, 2022, the Company's decommissioning liability balance was \$1.0 billion (\$1.5 billion at December 31, 2021) for future abandonment and reclamation of the Company's properties. The decrease in the decommissioning liability at December 31, 2022 compared to December 31, 2021 is primarily attributed to the increase in the risk-free rate from 1.7 percent at December 31, 2021 to 3.3 percent at December 31, 2022. Estimates are based on both operational knowledge of the properties and updated industry guidance provided by the Alberta Energy Regulator, the Saskatchewan Ministry of the Economy and the BC Oil and Gas Commission. The estimates are reviewed quarterly and adjusted as new information regarding the liability is determined.

Exhibit 7

MANAGEMENT'S DISCUSSION AND ANALYSIS

Capital Resources and Liquidity

At December 31, 2022, the Company had a total credit capacity of \$3.1 billion which consisted of a \$2.0 billion credit facility, a \$705 million term loan facility, and \$395 million in senior secured notes.

Credit Facility

At December 31, 2022, the Company had a \$2.0 billion credit facility with a syndicate of banks. The credit facility consists of a \$1.93 billion revolving syndicated facility and a \$75.0 million revolving operating facility, with a maturity date of May 31, 2026. At December 31, 2022 the amount drawn on the credit facilities was \$0.7 billion. Prior to any anniversary date, being May 31 of each year, Whitecap may request an extension of the then current maturity date, subject to approval by the banks. Following the granting of such extension, the term to maturity of the credit facilities shall not exceed four years. The credit facility provides that advances may be made by way of direct advances, banker's acceptances or letters of credit/guarantees. The credit facility bears interest at the bank's prime lending or bankers' acceptance rates plus applicable margins. The applicable margin charged by the bank is dependent upon the Company's debt to earnings before interest, taxes, depreciation and amortization ("**EBITDA**") ratio for the most recent quarter. The bankers' acceptances bear interest at the applicable banker's acceptance rate plus an explicit stamping fee based upon the Company's debt to EBITDA ratio. The credit facilities are secured by a floating charge debenture on the assets of the Company.

The following table lists Whitecap's financial covenants as at December 31, 2022:

Covenant Description		December 31, 2022
Debt to EBITDA ⁽¹⁾ ⁽²⁾	Maximum Ratio 4.00	0.69
EBITDA to interest expense ⁽¹⁾	Minimum Ratio 3.50	45.40

Notes:

⁽¹⁾ The EBITDA used in the covenant calculation is adjusted for non-cash items, transaction costs and extraordinary and non-recurring items such as material acquisitions or dispositions.

⁽²⁾ The debt used in the covenant calculation includes bank indebtedness, letters of credit, and dividends declared.

At December 31, 2022, the Company was compliant with all covenants provided for in the credit agreement. Copies of the Company's credit agreements and amendments may be accessed through the SEDAR website (www.sedar.com).

Term Loan

At December 31, 2022, the Company had a \$705 million term loan facility, which was obtained in conjunction with the closing of the XTO acquisition. The term loan has a maturity date of May 31, 2026 and is repayable at any time with no penalty. At December 31, 2022 the amount of the term loan outstanding was \$705 million. The term loan provides that advances may be made by way of direct advances or banker's acceptances. The term loan bears interest at the bank's prime lending or bankers' acceptance rates plus applicable margins. The applicable margin charged by the bank is dependent upon the Company's debt to EBITDA ratio for the most recent quarter.

The term loan is subject to the same debt to EBITDA ratio and EBITDA to interest expense ratio described under the credit facility. At December 31, 2022, the Company was compliant with all covenants provided for in the term loan agreement. A copy of the Company's term loan agreement may be accessed through the SEDAR website (www.sedar.com).

MANAGEMENT'S DISCUSSION AND ANALYSIS

Senior Secured Notes

At December 31, 2022, the Company had issued \$395 million senior secured notes. The notes rank equally with Whitecap's obligations under its credit facility and term loan.

The terms, rates and principals of the Company's outstanding senior notes are detailed below:

(\$ millions)			
Issue Date	Maturity Date	Coupon Rate	Principal
May 31, 2017	May 31, 2024	3.54%	200.0
December 20, 2017	December 20, 2026	3.90%	195.0
Balance at December 31, 2022			395.0

The senior secured notes are subject to the same debt to EBITDA ratio and EBITDA to interest expense ratio described under the credit facility. At December 31, 2022, the Company was compliant with all covenants provided for in the note agreements. Copies of the Company's note agreements and amendments may be accessed through the SEDAR website (www.sedar.com).

Equity

On May 16, 2022, the Company announced the approval of its renewed NCIB by the TSX (the "**2022 NCIB**"). The 2022 NCIB allows the Company to purchase up to 58,341,984 common shares over a period of twelve months commencing on May 21, 2022.

On May 17, 2021, the Company announced the approval of its renewed NCIB by the TSX (the "**2021 NCIB**"). The 2021 NCIB allowed the Company to purchase up to 29,894,096 common shares over a period of twelve months commencing on May 21, 2021. On March 22, 2022, the Company amended its 2021 NCIB to increase the number of common shares that it may purchase to 58,947,076 during the twelve month period commencing on May 21, 2021. No other terms of the NCIB changed.

On May 14, 2020, the Company announced the approval of its renewed NCIB by the TSX (the "**2020 NCIB**"). The 2020 NCIB allowed the Company to purchase up to 20,406,799 common shares over a period of twelve months commencing on May 21, 2020.

Purchases are made on the open market through the TSX or alternative platforms at the market price of such common shares. All common shares purchased under the NCIB are cancelled. The total cost paid, including commissions and fees, is first charged to share capital to the extent of the average carrying value of Whitecap's common shares and the excess is charged to retained earnings.

The following table summarizes the share repurchase activities during the period:

(millions except per share amounts)	Three months ended		Year ended	
	2022	December 31, 2021	2022	December 31, 2021
Shares repurchased ⁽¹⁾	4.9	19.2	25.0	24.3
Average cost (\$/share)	10.47	6.96	9.72	6.75
Amounts charged to				
Share capital (\$)	39.1	133.7	201.1	164.2
Deficit (\$)	11.9	-	41.4	-
Share repurchase cost (\$)	51.0	133.7	242.5	164.2

Note:

⁽¹⁾ At December 31, 2022, 2.2 million shares repurchased under the NCIB were held in treasury. Subsequent to year end, all of the shares held in treasury were cancelled.

MANAGEMENT'S DISCUSSION AND ANALYSIS

The Company is authorized to issue an unlimited number of common shares without nominal or par value. The Company is also authorized to issue an unlimited number of preferred shares without nominal or par value provided that, if the authorized preferred shares are to be assigned voting or conversion rights, the number of preferred shares to be issued may not exceed twenty percent of the number of issued and outstanding common shares at the time of issuance of any such preferred shares. At February 21, 2023, there were 606.4 million common shares and 6.1 million share awards outstanding.

Liquidity

The Company generally relies on funds flow and its credit facility to fund its capital requirements, dividend payments and provide liquidity. From time to time, the Company accesses capital markets to meet its additional financing needs for acquisitions. Future liquidity depends primarily on funds flow, existing credit facilities and the ability to access debt and equity markets. All repayments on the revolving production and operating facilities are due at the term maturity date. As none of the facilities mature within the next year, all liabilities related to the Company's debt are considered to be non-current. At December 31, 2022, the Company had \$1.4 billion of unutilized credit to cover any working capital deficiencies. The Company believes that available credit facilities, combined with anticipated funds flow, will be sufficient to satisfy Whitecap's 2023 development capital program and dividend payments for the 2023 fiscal year.

Contractual Obligations

Whitecap has contractual obligations in the normal course of business which may include purchase of assets and services, operating agreements, transportation commitments, sales commitments, royalty obligations, lease rental obligations, employee agreements and debt. These obligations are of a recurring, consistent nature and impact Whitecap's cash flows in an ongoing manner.

The Company is committed to future payments under the following agreements:

(\$ millions)	2023	2024	2025	2026+	Total
Lease liabilities ⁽¹⁾	7.9	7.3	6.7	29.2	51.1
Service agreements	4.6	4.5	4.0	24.9	38.0
Transportation agreements	103.1	80.3	73.7	389.9	647.0
CO ₂ purchase commitments	40.6	23.3	17.5	19.9	101.3
Long-term debt ⁽¹⁾	14.7	210.5	7.6	1,652.0	1,884.8
Total	170.9	325.9	109.5	2,115.9	2,722.2

Note:

⁽¹⁾ These amounts include the notional principal and interest payments.

Related Party Transactions

The Company has retained the law firm of Burnet, Duckworth & Palmer LLP ("**BD&P**") to provide Whitecap with legal services. A director of Whitecap is a partner of this firm. During the three months and year ended December 31, 2022, the Company incurred \$0.5 million and \$1.3 million, respectively, for legal fees and disbursements, (\$0.6 million and \$1.7 million for the three months and year ended December 31, 2021, respectively). These amounts have been recorded at the amounts that have been agreed upon by the two parties. The Company expects to retain the services of BD&P from time to time. At December 31, 2022, no payable balance was outstanding (nil – December 31, 2021).

Subsequent Event

On January 23, January 24, and February 1, 2023, the Company closed the previously announced dispositions of non-core assets for total consideration of \$389.5 million.

Changes in Accounting Policies Including Initial Adoption

There were no changes that had a material effect on the reported income or net assets of the Company.

Standards Issued but not yet Effective

There are no other standards or interpretations issued, but not yet adopted, that are anticipated to have a material effect on the reported net income or net assets of the Company.

MANAGEMENT'S DISCUSSION AND ANALYSIS

Off Balance Sheet Arrangements

The Company does not have any special purpose entities nor is it party to any arrangements that would be excluded from the balance sheet other than commitments disclosed in Note 22 "Commitments" to the Company's audited annual consolidated financial statements for the year ended December 31, 2022.

Critical Accounting Estimates

Whitecap's financial and operating results may incorporate certain estimates including:

- estimated revenues, royalties and operating expenses on production as at a specific reporting date but for which actual revenues and expenses have not yet been received;
- estimated expenditures on property, plant and equipment on projects that are in progress;
- estimated depletion, depreciation, amortization and accretion that are based on estimates of oil and gas reserves that the Company expects to recover in the future, commodity prices, estimated future salvage values and estimated future capital costs;
- estimated fair values of derivative contracts that are subject to fluctuation depending upon the underlying commodity prices and foreign exchange rates;
- estimated value of decommissioning liabilities that are dependent upon estimates of future costs, timing of expenditures and the risk-free rate;
- estimated income and other tax liabilities requiring interpretation of complex laws and regulations. All tax filings are subject to audit and potential reassessment after the lapse of considerable time;
- estimated stock-based compensation expense using the Black-Scholes option pricing model;
- estimated fair value of business combinations and goodwill requires management to make assumptions and estimates about future events. The assumptions and estimates with respect to determining the fair value of PP&E and exploration and evaluation assets acquired generally require the most judgment and include estimates of reserves acquired, forecast benchmark commodity prices, future costs and discount rates; and
- estimated recoverable amounts are based on estimated proved plus probable oil and natural gas reserves, production rates, benchmark commodity prices, future costs, discount rates and other relevant assumptions, used in impairment (reversal) calculations and the assessment of appropriate accounting treatment of sale of royalty interests.

For more details regarding the Company's use of estimates and judgements, refer to Note 2(d) "Use of Estimates and Judgements" to the Company's audited annual consolidated financial statements for the year ended December 31, 2022.

The Company has hired individuals and consultants who have the skills required to make such estimates and ensures that individuals or departments with the most knowledge of the activity are responsible for the estimates. Furthermore, past estimates are reviewed and compared to actual results, and actual results are compared to budgets in order to make more informed decisions on future estimates.

Business Risks

Whitecap's exploration and production activities are concentrated in the Western Canadian Sedimentary Basin, where activity is highly competitive and includes a variety of different-sized companies. Whitecap is subject to a number of risks that are also common to other organizations involved in the oil and gas industry. Such risks include finding and developing oil and gas reserves at economic costs, estimating amounts of recoverable reserves, production of oil and gas in commercial quantities, marketability of oil and gas produced, fluctuations in commodity prices, stock market volatility, debt service which may limit timing or amount of dividends as well as market price of shares, financial and liquidity risks and environmental and safety risks.

In order to reduce exploration risk, Whitecap employs or contracts highly qualified and motivated professionals who have demonstrated the ability to generate quality proprietary geological and geophysical prospects. Whitecap has retained independent petroleum consultants that assist the Company in evaluating recoverable amounts of oil and gas reserves. Values of recoverable reserves are based on a number of variable factors and assumptions such as commodity prices, projected production, future production costs and government regulations. Such estimates will vary from actual results and such variations may be material.

MANAGEMENT'S DISCUSSION AND ANALYSIS

The Company mitigates its risk related to producing hydrocarbons through the utilization of current technology and information systems. In addition, Whitecap strives to operate the majority of its prospects, thereby maintaining operational control. When the Company does not operate, it relies on its partners in jointly owned properties to maintain operational control.

Whitecap is exposed to market risk to the extent that the demand for oil and gas produced by the Company exists within Canada and the United States. External factors beyond the Company's control may affect the marketability of oil and gas produced. These factors include commodity prices and variations in the Canada–United States currency exchange rate which, in turn, responds to economic and political circumstances throughout the world. Oil prices are affected by worldwide supply and demand fundamentals while natural gas prices are affected by North American supply and demand fundamentals. Whitecap uses futures and options contracts to mitigate its exposure to the potential adverse impact of commodity price volatility. The primary objective of the risk management program is to provide a measure of stability to Whitecap dividends and its capital development program.

Exploration and production for oil and gas is capital intensive. In addition to funds flow, the Company accesses the equity markets as a source of new capital. In addition, Whitecap utilizes bank financing to support ongoing capital investments which exposes the Company to fluctuations in interest rates on its bank debt. Funds flow also fluctuates with changing commodity prices. Equity and debt capital are subject to market conditions, and availability may increase or decrease from time to time.

The Company's business, operations and financial condition were significantly adversely affected by COVID-19. Actions taken to reduce the spread of COVID-19 resulted in volatility and disruptions in regular business operations, supply chains and financial markets, as well as declining trade and market sentiment. In 2020, COVID-19, as well as other factors, resulted in the deepest drop in crude oil prices that global markets have seen since 1991. The extent to which Whitecap's operational and financial results continue to be affected by COVID-19 will depend on whether, and to what extent, actions are taken by businesses and governments in response to any resurgence of the pandemic and the speed and effectiveness of responses to combat any such resurgence of the virus.

Additional information regarding risk factors including, but not limited to, business risks is available in our Annual Information Form for the year ended December 31, 2022, a copy of which may be accessed through the SEDAR website (www.sedar.com).

Environmental Risks

General Risks

Oil and gas exploration and production can involve environmental risks such as litigation, physical and regulatory risks. Physical risks include the pollution of the environment, climate change and destruction of natural habitat, as well as safety risks such as personal injury. The Company works hard to identify the potential environmental impacts of its new projects in the planning stage and during operations. The Company conducts its operations with high standards in order to protect the environment, its employees and consultants, and the general public. Whitecap maintains current insurance coverage for comprehensive and general liability as well as limited pollution liability. The amount and terms of this insurance are reviewed on an ongoing basis and adjusted as necessary to reflect current corporate requirements, as well as industry standards and government regulations. Without such insurance, and if the Company becomes subject to environmental liabilities, the payment of such liabilities could reduce or eliminate its available funds or could exceed the funds the Company has available and result in financial distress.

Climate Change Risks

Our exploration and production facilities and other operations and activities emit greenhouse gasses ("**GHG**") which may require us to comply with federal and/or provincial GHG emissions legislation. Climate change policy is evolving at regional, national and international levels, and political and economic events may significantly affect the scope and timing of climate change measures that are ultimately put in place to prevent climate change or mitigate its effects. The direct or indirect costs of compliance with GHG-related regulations may have a material adverse effect on our business, financial condition, results of operations and prospects. Some of our significant facilities may ultimately be subject to future regional, provincial and/or federal climate change regulations to manage GHG emissions. In addition, climate change has been linked to long-term shifts in climate patterns and extreme weather conditions both of which pose the risk of causing operational difficulties.

MANAGEMENT'S DISCUSSION AND ANALYSIS

Additional information regarding risk factors including, but not limited to, environmental risks is available in our Annual Information Form for the year ended December 31, 2022, a copy of which may be accessed through the SEDAR website (www.sedar.com).

Over the past eight quarters, fluctuations in production volumes and realized commodity prices have impacted the Company's petroleum and natural gas revenues and funds flow. Net income has fluctuated due to changes in funds flow, impairment expenses and reversals, and unrealized risk management gains and losses which fluctuate with the changes in forward benchmark commodity prices and exchange rates. Capital expenditures and production volumes have fluctuated over time as a result of the timing of acquisitions and dispositions and the impact of market conditions on the Company's development capital expenditures.

MANAGEMENT'S DISCUSSION AND ANALYSIS

The following outlines the significant events over the past eight quarters:

In the fourth quarter of 2022, the Company announced that it had entered into three definitive agreements to dispose of certain non-core assets, effective October 1, 2022. The assets were classified as held for sale at December 31, 2022. In December 2022, Whitecap's Board of Directors approved an increase to the monthly dividend from \$0.0367 per common share to \$0.0483 per common share (\$0.58 per common share annualized). The dividend increase is effective for the January 2023 dividend payable in February 2023. The Company repurchased 4.9 million common shares at an average price of \$10.50 per share during the fourth quarter of 2022.

In the third quarter of 2022, the Company closed the acquisition of XTO Energy Canada and achieved record production. In connection with the XTO acquisition, the Company closed the issuance of a new term loan of \$705 million and increased the existing syndicated facility by \$395 million to \$1.93 billion, resulting in an increase to the Company's total credit capacity to \$3.1 billion. The Company repurchased 8.4 million common shares at an average price of \$8.45 per share during the third quarter of 2022.

In the second quarter of 2022, Whitecap's Board of Directors approved an increase to the monthly dividend from \$0.03 per common share to \$0.0367 per common share (\$0.44 per common share annualized). The dividend increase was effective for the July 2022 dividend payable in August 2022. The Company repurchased 11.7 million common shares at an average price of \$10.30 per share during the second quarter of 2022.

In the first quarter of 2022, the Company closed the acquisition of TimberRock. In February 2022, as a result of the strong operational performance and the successful integration of the acquisitions completed in 2021 and 2022, Whitecap's Board of Directors approved an increase to the monthly dividend from \$0.0225 per common share to \$0.03 per common share (\$0.36 per common share annualized). The dividend increase was effective for the March 2022 dividend payable in April 2022. Additionally, as a result of higher forecast benchmark commodity prices at March 31, 2022 compared to December 31, 2021, the Company recognized impairment reversals of \$629.7 million attributable to PP&E.

In the fourth quarter of 2021, the Company extended the maturity date on its credit facility to May 31, 2026 and increased the credit facility to \$1.6 billion. The Company repurchased 19.2 million Whitecap common shares at an average price of \$6.96 per share, during the fourth quarter of 2021, executed by way of a block trade under its NCIB.

In the third quarter of 2021, the Company closed the acquisition of HighRock. Additionally, as a result of higher forecast benchmark commodity prices at September 30, 2021 compared to December 31, 2020, the Company recognized impairment reversals of \$1.9 billion attributable to PP&E. In October 2021, Whitecap's Board of Directors approved an increase to the monthly dividend from \$0.01625 per common share to \$0.0225 per common share (\$0.27 per common share annualized). The dividend increase was effective for the October 2021 dividend payable in November 2021.

In the second quarter of 2021, the Company closed the acquisition of Kicking Horse. As a result of operational performance and increased commodity prices, in May 2021, Whitecap's Board of Directors approved an increase to the monthly dividend from \$0.01508 per common share to \$0.01625 per common share (\$0.195 per common share annualized). The dividend increase was effective for the June 2021 dividend payable in July 2021.

In the first quarter of 2021, the Company closed the NAL and TORC acquisitions. Concurrent with the closing of the TORC acquisition, Whitecap's credit facility was increased by \$230 million to \$1.405 billion from \$1.175 billion. At the time, the credit facility consisted of a \$1.33 billion revolving syndicated facility and a \$75 million revolving operating facility, with an initial maturity date of May 31, 2023. Effective March 26, 2021, the credit facility was further extended to a maturity date of May 31, 2025.

In connection with the TORC acquisition, Whitecap's Board of Directors approved an increase in the Company's monthly dividend from \$0.01425 per common share to \$0.01508 per common share (\$0.18096 per common share annualized). The dividend increase was effective for the March 2021 dividend payable in April 2021. Production in the first three quarters of 2021 was higher than the preceding quarters primarily due to the acquisitions completed in 2021.

MANAGEMENT'S DISCUSSION AND ANALYSIS

DISCLOSURE CONTROLS AND PROCEDURES

Disclosure controls and procedures ("**DC&P**"), as defined in National Instrument 52-109 *Certification of Disclosure in Issuers' Annual and Interim Filings*, are designed to provide reasonable assurance that information required to be disclosed in the Company's annual filings, interim filings or other reports filed, or submitted by the Company under securities legislation is recorded, processed, summarized and reported within the time periods specified under securities legislation and include controls and procedures designed to ensure that information required to be so disclosed is accumulated and communicated to management, including the Chief Executive Officer and the Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. The Chief Executive Officer and the Chief Financial Officer of Whitecap evaluated, or caused to be evaluated under their supervision, the effectiveness of the Company's DC&P as at December 31, 2022. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that Whitecap's DC&P were effective as at December 31, 2022.

INTERNAL CONTROLS OVER FINANCIAL REPORTING

Internal control over financial reporting ("**ICFR**"), as defined in National Instrument 52-109, includes those policies and procedures that:

1. pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect transactions and dispositions of assets of Whitecap;
2. are designed to provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles and that receipts and expenditures of Whitecap are being made only in accordance with authorizations of management and Directors of Whitecap; and
3. are designed to provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company's assets that could have a material effect on the Company's annual financial statements or interim financial reports.

The Chief Executive Officer and the Chief Financial Officer are responsible for establishing and maintaining ICFR for Whitecap. They have, as at December 31, 2022, designed ICFR, or caused it to be designed under their supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with IFRS. In May 2013, The Committee of Sponsoring Organizations of the Treadway Commission ("**COSO**") issued an updated Internal Control-Integrated Framework ("**2013 Framework**") replacing the Internal Control - Integrated Framework (1992). The control framework Whitecap's Chief Executive Officer and Chief Financial Officer used to design the Company's ICFR is the 2013 Framework.

Under the supervision of the Chief Executive Officer and the Chief Financial Officer, Whitecap conducted an evaluation of the effectiveness of the Company's ICFR as at December 31, 2022 based on the 2013 Framework. Based on this evaluation, the officers concluded that as of December 31, 2022, Whitecap maintained effective ICFR.

It should be noted that while Whitecap's officers believe that the Company's controls provide a reasonable level of assurance with regard to their effectiveness, they do not expect that the DC&P and ICFR will prevent all errors or intentional misstatements resulting from fraudulent activities. A control system, no matter how well conceived or operated, can provide only reasonable, but not absolute, assurance that the objectives of the control system are met.

There were no changes in Whitecap's ICFR during the three month period ended December 31, 2022 that materially affected, or are reasonably likely to materially affect, the Company's ICFR.

MANAGEMENT'S DISCUSSION AND ANALYSIS

ADVISORIES

Boe Presentation

"Boe" means barrel of oil equivalent. All boe conversions in this MD&A are derived by converting gas to oil at the ratio of six thousand cubic feet ("**Mcf**") of natural gas to one barrel ("**bbl**") of oil. Boe may be misleading, particularly if used in isolation. A boe conversion rate of 1 bbl : 6 Mcf is based on an energy equivalency conversion method primarily applicable at the burner tip and does not represent a value equivalency at the wellhead. Given that the value ratio of oil compared to natural gas based on currently prevailing prices is significantly different than the energy equivalency ratio of 1 bbl : 6 Mcf, utilizing a conversion ratio of 1 bbl : 6 Mcf may be misleading as an indication of value.

Supplementary Financial Measures

Average realized prices for crude oil, NGLs and natural gas are supplementary financial measures calculated by dividing each of these components of petroleum and natural gas revenues, disclosed in Note 16 "Revenue" to the Company's audited annual consolidated financial statements for the year ended December 31, 2022, by their respective production volumes for the period.

Per boe disclosures for petroleum and natural gas revenues, tariffs, processing and other income and marketing revenues are supplementary financial measures calculated by dividing each of these components of petroleum and natural gas sales, disclosed in Note 16 "Revenue" to the Company's audited annual consolidated financial statements for the year ended December 31, 2022, by the Company's total production volumes for the period.

Realized gain (loss) on commodity contracts per boe is a supplementary financial measure calculated by dividing realized gain (loss) on commodity contracts, disclosed in Note 5(d) "Financial Instruments and Risk Management – Market Risk" to the Company's audited annual consolidated financial statements for the year ended December 31, 2022, by the Company's total production volumes for the period.

Per boe disclosures for petroleum and natural gas sales, royalties, operating expenses, transportation expenses, marketing expenses, G&A expenses, stock-based compensation expenses, interest and financing expenses, and depletion, depreciation and amortization are supplementary financial measures that are calculated by dividing each of these respective GAAP measures by the Company's total production volumes for the period.

Royalties as a percentage of petroleum and natural gas revenues is a supplementary financial measure calculated by dividing royalties by petroleum and natural gas revenues, disclosed in Note 16 "Revenue" to the Company's audited annual consolidated financial statements for the year ended December 31, 2022.

Product Type Information

This MD&A includes references to crude oil, NGLs, natural gas and total average daily production.

NI 51-101 includes condensate within the natural gas liquids ("**NGLs**") product type. The Company has disclosed condensate as combined with crude oil and separately from other natural gas liquids in this MD&A since the price of condensate as compared to other natural gas liquids is currently significantly higher and the Company believes that this combined crude oil and condensate presentation provides a more accurate description of its operations and results therefrom. Crude oil therefore refers to light, medium and tight oil and condensate combined. NGLs refers to ethane, propane, butane and pentane combined. Natural gas refers to conventional natural gas and shale gas combined.

MANAGEMENT'S DISCUSSION AND ANALYSIS

The Company's aggregate average production for the past eight quarters and the references to "crude oil", "NGLs", and "natural gas" reported in this MD&A consist of the following product types, as defined in NI 51-101 and using a conversion ratio of 1 bbl : 6 Mcf where applicable:

	2022				2021			
	Q4	Q3	Q2	Q1	Q4	Q3	Q2	Q1
Light and medium oil (bbls/d) ⁽¹⁾	80,776	79,180	82,401	79,406	75,628	74,722	78,645	64,705
Tight oil (bbls/d)	11,036	5,957	3,256	3,574	3,687	2,466	1,426	90
Crude oil (bbls/d)	91,812	85,137	85,657	82,980	79,315	77,188	80,071	64,795
NGLs (bbls/d)	17,473	16,513	13,465	14,591	10,568	10,279	11,308	9,508
Shale gas (Mcf/d)	181,478	104,358	50,250	51,605	42,993	26,293	11,489	299
Conventional natural gas (Mcf/d)	161,162	160,528	148,776	159,115	137,827	144,514	141,032	128,852
Natural gas (Mcf/d)	342,640	264,886	199,026	210,720	180,820	170,807	152,521	129,151
Total (boe/d)	166,392	145,798	132,293	132,691	120,020	115,935	116,799	95,828

Note:

⁽¹⁾ Light and medium oil includes condensate.

The Company's aggregate average production for the years ended December 31, 2020, 2021 and 2022 and the references to "crude oil", "NGLs", and "natural gas" reported in this MD&A consist of the following product types, as defined in NI 51-101 and using a conversion ratio of 1 bbl : 6 Mcf where applicable:

	2022	2021	2020
Light and medium oil (bbls/d) ⁽¹⁾	80,441	73,458	52,559
Tight oil (bbls/d)	5,976	1,929	97
Crude oil (bbls/d)	86,417	75,387	52,656
NGLs (bbls/d)	15,521	10,418	4,982
Shale gas (Mcf/d)	97,299	20,402	335
Conventional natural gas (Mcf/d)	157,409	138,099	65,811
Natural gas (Mcf/d)	254,708	158,501	66,146
Total (boe/d)	144,389	112,222	68,662

Note:

⁽¹⁾ Light and medium oil includes condensate.

Forward-Looking Information and Statements

Certain statements contained in this MD&A constitute forward-looking statements and are based on Whitecap's beliefs and assumptions based on information available at the time the assumption was made. By its nature, such forward-looking information involves known and unknown risks, uncertainties and other factors that may cause actual results or events to differ materially from those anticipated in such forward-looking statements. The Company believes the expectations reflected in those forward-looking statements are reasonable, but no assurance can be given that these expectations will prove to be correct and such forward-looking statements should not be unduly relied upon.

This MD&A contains certain forward-looking information and statements within the meaning of applicable securities laws. The use of any of the words "expect", "anticipate", "estimate", "objective", "ongoing", "may", "will", "project", "believe", "measure", "stability", "depends", "could", "sustainability" and similar expressions are intended to identify forward-looking information or statements. In particular, but without limiting the foregoing, this MD&A contains forward-looking information and statements pertaining to the following: Whitecap's focus and strategy; Whitecap's ongoing risk management program and the benefits to be derived therefrom; terms of the Company's risk management contracts; the factors that may affect Whitecap's marketing activities; the amount of future decommissioning liabilities; future liquidity and financial capacity; sources of funding the Company's capital program and dividend payments; the belief that available credit facilities combined with anticipated funds flow will be sufficient to satisfy Whitecap's 2023 development capital program and dividend payments for the 2023 fiscal year; Whitecap's

MANAGEMENT'S DISCUSSION AND ANALYSIS

deductions available for deferred income tax purposes; the terms of Whitecap's future contractual obligations; and the actions Whitecap expects to take to mitigate the business, environmental and other risks that it faces.

The forward-looking information and statements contained in this MD&A reflect several material factors and expectations and assumptions of Whitecap including, without limitation: that Whitecap will continue to conduct its operations in a manner consistent with past operations; the general continuance or improvement in current industry conditions; the continuance of existing (and in certain circumstances, the implementation of proposed) tax, royalty and regulatory regimes; the impact (and the duration thereof) that the continuing COVID-19 pandemic will have on (i) the demand for crude oil, NGLs and natural gas, (ii) our supply chain, including our ability to obtain the equipment and services we require, and (iii) our ability to produce, transport and/or sell our crude oil, NGLs and natural gas; the accuracy of the estimates of Whitecap's reserve volumes; the impact of increasing competition; the general stability of the economic and political environment in which Whitecap operates; the ability of Whitecap to obtain qualified staff, equipment supplies and services in a timely and cost efficient manner; the ability of Whitecap to efficiently integrate assets and employees acquired through acquisitions; drilling results; the ability of the operator of the projects which the Company has an interest in to operate in a safe, efficient and effective manner; field production and decline rates; future operating costs; the ability to replace and expand oil and natural gas reserves through acquisition, development or exploration; the timing and costs of pipeline, storage and facility construction and expansion; the ability of the Company to secure adequate product transportation; future petroleum and natural gas prices; currency, exchange, inflation and interest rates; the continued availability of adequate debt and equity financing and funds flow to fund Whitecap's planned expenditures, dividends, and share repurchases; the ability of OPEC+ nations and other major producers of crude oil to adjust production and thereby manage world crude oil prices; the impact (and duration, thereof) of the ongoing military actions between Russia and Ukraine and related sanctions on crude oil, NGLs, and natural gas prices; and the ability to maintain dividend payments at current levels. Whitecap believes the material factors, expectations and assumptions reflected in the forward-looking information and statements are reasonable, but no assurance can be given that these factors, expectations and assumptions will prove to be correct.

The forward-looking information and statements included in this MD&A are not guarantees of future performance and should not be unduly relied upon. Such information and statements involve known and unknown risks, uncertainties and other factors that may cause actual results or events to differ materially from those anticipated in such forward-looking information or statements including, without limitation: changes in commodity prices; changes in the demand for or supply of Whitecap's products; the continuing impact of the COVID-19 pandemic; unanticipated operating results or production declines; changes in tax or environmental laws, royalty rates or other regulatory matters; changes in Whitecap's development plans or by third party operators of Whitecap's properties; competition from other producers; inability to retain drilling rigs and other services; failure to realize the anticipated benefits of acquisitions; incorrect assessment of the value of acquisitions; delays resulting from or inability to obtain required regulatory approvals; increased debt levels or debt service requirements; increased interest rates; inaccurate estimation of Whitecap's oil and gas reserve volumes; limited, unfavourable or a lack of access to capital markets; increased costs, whether due to high inflation rates, supply chain disruptions or other factors; availability of qualified staff, equipment supply and services; a lack of adequate insurance coverage; the impact of competitors; and certain other risks detailed from time to time in Whitecap's public disclosure documents (including, without limitation, those risks identified in this MD&A) and may be accessed through the SEDAR website (www.sedar.com).

The forward-looking information and statements contained in this MD&A speak only as of the date of this MD&A, and Whitecap does not assume any obligation to publicly update or revise them to reflect new events or circumstances, except as may be required pursuant to applicable laws.
